CODE STRUCTURES APRIL 2004

1. The Manual of Navy Officer Manpower and Personnel Classifications is the principal reference manual for interpretation of coded entries on manpower and personnel documents and reports. It is published in two volumes, each issued separately. Volume I of the Manual of Navy Officer Manpower and Personnel Classifications contains the major officer code structures.
2. Changes to Volume I of the Manual of Navy Officer Manpower and Personnel Classifications included in Change 18 are effective upon receipt.
3. Requests to have an activity added to the CD-ROM automatic distribution list should be addressed to the following:

Address

Department of the Navy
Navy Personnel Command
Attn: PERS 013
5720 Integrity Drive
Millington TN 38055-0130

and contain the following pertinent information:

Standard Navy Distribution List Number (SNDL)
UIC
Activity Name
Address
Activity Acronym
Attention Code
Phone Number and Point of Contact
Number of CDs required
Justification

INTRODUCTION

NAVY OFFICER OCCUPATIONAL CLASSIFICATION SYSTEM (NOOCS)

1. Purpose.

a. The Navy Officer Occupational Classification System (NOOCS) is the method the Navy uses to identify skills, education, training, experience and capabilities related to both officer personnel and manpower requirements. This system consists of code structures that form the basis for officer manpower management and officer personnel procurement, training, promotion, distribution, career development and mobilization.

b. The Manual of Navy Officer Manpower and Personnel Classifications, NAVPERS 15839I, published in two volumes, each issued separately, explains NOOCS codes and other code structures and established abbreviations used to identify the qualitative needs for officer manpower and for reporting and recording officer qualifications and other personnel data.

c. Volume I of this manual contains the code structure for each of the four subsystems of NOOCS - Designator/Grade, Subspecialty (SSP), Navy Officer Billet Classifications (NOBC), and Additional Qualification Designation (AQD).

d. Volume II of this manual contains, in addition to a description of the Officer Data Card (ODC), NAVPERS 1301/51, a listing of non-occupational manpower and personnel codes which provides foreign language, ship and station, service school, education, and other identifiers.

e. NOOCS is further complemented by certain manpower-unique codes and officer special qualifications found in Manual of Navy Total Force Manpower Policies and Procedures, OPNAVINST 1000.16 series, and Naval Military Personnel Manual, NAVPERS 15560, respectively.

2. NOOCS Subsystems/Code Structures.

a. The Designator/Grade structure consists of designators and grades that provide a framework for officer career development and promotion. This structure is the primary administrative means for classifying, identifying and documenting officer manpower resources and requirements.

(1) The Designator (DESIG) structure identifies primary specialty qualifications, associated legal and specialty categories and competitive categories for promotion.

(2) The Grade (GR) structure identifies occupational levels associated with the scale of naval officer paygrade and rank.

b. The Subspecialty (SSP) structure identifies postgraduate education (or equivalent training and/or experience) in various fields and disciplines.

c. The Navy Officer Billet Classification (NOBC) structure functionally describes general occupational duties.

d. The Additional Qualification Designation (AQD) structure identifies additional qualifications and skills not included in the other code structures.

3. NOOCS Control and Application.

a. The Deputy Chief of Naval Operations (DCNO) (Manpower and Personnel) (MP) (N1) and the Chief of Naval Personnel (CHNAVPERS) provide policy guidance and system control for NOOCS. A NOOCS Board assists in the management of NOOCS.

b. The Chief of Naval Operations establishes officer billets in Manpower Authorizations (MPAs) and identifies the qualitative requirements of the billets by NOOCS codes and other codes.

c. The Chief of Naval Personnel records and reports automated information for each naval officer through NOOCS codes and other codes in the Manpower and Personnel Information System (MAPIS). Commanding Officer, Naval Reserve Personnel Center (NAVRESPERSSEN) maintains similar automated information for each naval reserve officer in the Inactive Manpower and Personnel Management Information System (IMAPMIS).

d. The Assistant Secretary of Defense (Force Management and Personnel) uses NOOCS codes to relate Navy occupational data to the Department of Defense occupational groupings used in manpower management and policy studies and as a basis for comparing manpower resources in the U. S. Armed Forces.

e. Activities use the NOOCS codes to identify the qualitative requirements of their billets.

4. Recommendations for Establishing, Deleting or Revising Subsystem(s) within NOOCS. The NOOCS Board, per OPNAVINST 1210.2B, serves as the central point for changes to the Navy Officer Occupational Classification System. Activities proposing establishment, deletion or revision to NOOCS subsystems should send recommendations via the appropriate chain of command to:

COMMANDING OFFICER
NAVY MANPOWER ANALYSIS CENTER
(ATTN: CODE 10)
5720 INTEGRITY DRIVE
MILLINGTON, TN 38054-5011

"Via addressees" should make a statement for or against the proposal(s) and provide any additional information that will assist the NOOCS Board in determining whether to approve or disapprove the recommendation.

PART A

Section 1 General

1. General Categories. Billet and officer designator codes are grouped in general categories as follows:

a. Unrestricted Line. Officers of the line of the Regular Navy and Naval Reserve who are not restricted in the performance of duty.

b. Restricted Line. Officers of the line of the Regular Navy and Naval Reserve who are restricted in the performance of duty by having been designated for aviation duty, engineering duty, aerospace engineering duty, or special duty.

c. Unrestricted Line - Prospective Staff Corps. Unrestricted Line officers under instruction as prospective officers of a specific staff corps.

d. Staff Corps. Officer of all staff corps of the Regular Navy and Naval Reserve. The eight staff corps are:

- | | |
|------------------------------------|--------------------------|
| (1) Medical Corps | (5) Nurse Corps |
| (2) Dental Corps | (6) Supply Corps |
| (3) Medical Service Corps | (7) Chaplain Corps |
| (4) Judge Advocate General's Corps | (8) Civil Engineer Corps |

e. Limited Duty - Line. Officers of the line of the Regular Navy and Naval Reserve appointed for the performance of duty in the broad occupational fields indicated by their former warrant designators or enlisted rating groups.

f. Limited Duty - Staff. Officers of the staff of the Regular Navy and Naval Reserve appointed for the performance of duty in the broad occupational fields indicated by their former warrant designators or enlisted rating groups.

g. Chief Warrant - Line. Officers of the line of the Regular Navy and Naval Reserve appointed to chief warrant officer for the performance of duty in the technical fields indicated by former enlisted rating groups.

h. Chief Warrant - Staff. Officers of the staff of the Regular Navy and Naval Reserve appointed to chief warrant officer for the performance of duty in the technical fields indicated by former enlisted rating groups.

2. Officer Billet Designator Codes

a. The officer billet designator codes are four-digit numbers used to identify the primary naval specialty qualifications required of the billet incumbent and to administratively categorize officer billets for proper management and identification. They serve as a manpower management tool when used in conjunction with the officer designator codes. These codes are entered in the Manpower Authorizations (OPNAV Form 1000/2) to indicate the categories of officers required for the billets.

b. Category Definitions of Billets Requiring Aeronautically Designated Officers

(1) Code 0 - Other Than Operational Flying Billet. This category billet (Designator Codes 1230, 1240, 1250, 13X0, 6300) requires an aeronautically designated officer because of his/her aviation oriented background, experience and warfare expertise, but no requirements exists to operate an aircraft or its weapons systems in support of specific aviation operational missions. Certain aeronautically designated incumbents of other than operational flying billets are eligible to participate while in a DIFDEN status as described in OPNAVINST 3710.7 series.

(2) Code 1 - Operational Flying. This category billet (Designator Codes 12X1, 13X1, 15X1, 63X1, 7321) is derived from the application of crew ratios multiplied against unit equipped aircraft. It is a billet in which an aeronautically designated officer is required to participate as a crew member in the operation of an aircraft or its weapons systems in support of specific aviation operational missions. Such operational missions include, but are not limited to, Tactical Air, ASW, SAR, Fleet Support, Training, Test and Evaluation, Logistic or Staff Support. In each instance, incumbents of operational flying billets are required to maintain basic flying skills and to fly frequently and regularly in the performance of their assigned duties. Such flying is considered operational flying as defined in paragraph 1001 of OPNAVINST 3710.7 series.

(3) Code 2 - Operational Flying. This category billet (Designator Codes 12X2, 13X2, 15X2, 1802, 2102, 2302, 6302) requires an aeronautically designated officer to fly frequently and regularly in the performance of the assigned duties, but the requirement is not derived from the application of crew ratios against unit equipped aircraft. Designated billets involve crew member flight duties which vary from complete aircraft/weapons system utilization to those less demanding in airborne duties and frequency of flight. Such operational missions include, but are not limited to, pertinent flight functions involving the exercise of Command and Control of Aircraft, Mission Support, Flight Safety, Aircrew Evaluation, Operational Readiness, Maintenance Programs and Weapons Test Evaluation. Such flying is considered operational flying as defined in paragraph 1001 of OPNAVINST 3710.7 series.

3. Officer Designator Codes

The officer designator codes are four-digit numbers used to group officers by categories for personnel accounting and administrative purposes and to identify the status of officers. These codes identify, through the first three digits, the categories in which officers are appointed and/or designated and, through the fourth digit, the status of the officers within the various categories. A listing by the first three digits of the officer designator codes and their description and the translation of the fourth digit are included in the following section.

4. Officer Community Manager (OCM)

As indicated in the following section, are assigned by the CNO to represent the special interests and provide management advice for the respective specialty categories. Specific responsibilities are assigned in OPNAVINST 1210.2 series.

5. Recommendations to Establish, Delete or Revise Designators

a. Commands recommending establishing, deleting or revising codes within the designator structure should include the appropriate information as follows:

(1) Recommendations to establish a designator code must include:

(a) Recommended code number and description

(b) Background

- Innovations involved
- Problem areas (current and future)

(c) Training and education

- Current
- Proposed
- Savings - if any
- Long range implications

(d) Funding implications

- New costs
- Programmed funds/billets

- (e) Billet structure
 - Before change, number and grade spread
 - After change, number and grade spread
 - (f) Promotion
 - (g) Distribution
 - NOBC/AQD/SSP code implications
 - Women in the designator
 - (h) Reserve implications
 - (i) Personnel affected
 - (j) Advantages
 - (k) Disadvantages
 - (l) Recommendations
 - (m) Point of contact (include telephone (both commercial and DSN) number, telefax number, and e-mail address)
- (2) Recommendations to delete a designator code must include:
- (a) Code number and title
 - (b) Background (reason for deletion)
 - (c) Training and education
 - Necessary retraining
 - Savings - if any
 - Long range implications
 - (d) Billet structure
 - Before change, number and grade spread
 - Information on how to recode personnel presently coded with this designator (include effective dates)
 - (e) Personnel affected (include inventory depletion)
 - (f) Information requested in paragraphs 5a(1)(h) and (j) through (m)
- (3) Recommendations to revise a designator code must include:
- (a) Current code number and title
 - (b) Proposed recoding, retitling and/or rewording of current designator
 - (c) Justification for proposed revision
 - (d) Information, as applicable, requested in paragraphs 5a(1)(c) through (m)

b. Submit all recommendations according to the procedures outlined in the introduction of this manual. Include Chief of Naval Personnel (N131) as community managers for the designators in the "via addressees."

PART A

Section 3 Officer Grade Codes

In personnel and manpower automated files and in documents produced from those files, the grades of officers and the officer grades allowed in billets are identified by a one-letter code or by an abbreviation. The codes and abbreviations and the officer grades they identify are listed below.

<u>Billet Code</u>	<u>Pers Code</u>	<u>Grade</u>	<u>Pay Grade</u>	<u>Abbr.</u>
*	A	Fleet Admiral	012**	FADM
B	B	Admiral	010	ADM
C	C	Vice Admiral	09	VADM
D	D	Rear Admiral	08	RDMU
E	---	Rear Admiral/Rear Admiral (Lower Half)	08/07	RDMU/RDML
F	E	Rear Admiral (Lower Half)	07	RDML
G	G	Captain	06	CAPT
H	H	Commander	05	CDR
I	I	Lieutenant Commander	04	LCDR
J	J	Lieutenant	03	LT
K	K	Lieutenant (junior grade)	02	LTJG
L	L	Ensign	01	ENS
M	M	Chief Warrant Officer-4	W4	CWO4
N	N	Chief Warrant Officer-3	W3	CWO3
O	O	Chief Warrant Officer-2	W2	CWO2
*	P	Warrant Officer-1	W1	WO1
R	R	Chief Warrant Officer-5	W5	CWO5

* Codes A and P are not used currently on manpower authorizations.

** Paygrade 012 is used here (vice paygrade 011) since paygrade 011 reflects an Admiral (paygrade 010) serving in certain billets for which additional pay is authorized (e.g., CNO, Chairman JCS).

PART B

SUBSPECIALTY (SSP) CODES

1. Navy Subspecialty System

a. The Navy Subspecialty System is an integrated manpower and personnel classification and control system which establishes criteria and procedures for identifying officer requirements for advanced education, functional training, and significant experience in various fields and disciplines. Similarly, the Navy Subspecialty System is used to identify those officers who acquire these qualifications. In addition to identifying qualitative officer manpower needs, the Navy Subspecialty System is used as the basis for generating the Navy's advanced education requirements.

b. The SSP classification codes, criteria for applying these codes and procedures for establishing SSP codes as a part of officer manpower requirements are contained in this manual. The Subspecialty policy is contained in OPNAVINST 1000.16 series.

c. Subspecialty Application Responsibilities. The functions, tasks, and responsibilities of the Navy Subspecialty System Consultants, Coordinators, and Sponsors are contained in OPNAVINST 1000.16 series. CNO (N131) coordinates assignment of SSPs to billets; PERS-440 coordinates assignment of SSPs to officers on active duty and PERS-911 manages SSP coding for reserve officers on inactive duty.

2. Specialty and Subspecialty Concept. The area of specialization (specialty) required in a billet is identified by the designator code. Certain billets requiring additional qualifications beyond those indicated by a designator code are further identified by SSP codes. These codes define the field of application and additional education; experience and training qualifications needed to satisfy special requirements, which meet specific criteria of the SSP validation process. SSPs are applicable to the Unrestricted Line, Restricted Line, and Staff Corps, and are professional development fields secondary to designator specialties.

3. Subspecialty Coding System

a. Subspecialty Code Description. SSP codes are made up of five characters; four numerals and an alphabetic suffix:

- (1) The 1st digit indicates the subspecialty Major Area.
- (2) The 2nd digit indicates Concentration Area.
- (3) The 3rd and 4th digits provide specificity (further specialization as required). Officers and billets must meet the requirements outlined in the new Core Skill Requirements (CSRs) and Educational Skills Requirements (ESRs) as developed by the Subject Matter Expert (SME) or Major Area Sponsor (MAS).

- (4) The suffix (5th character) indicates the level of education/training/experience in the subspecialty.

b. Subspecialty Coding Restrictions

(1) LDO/WO. Subspecialty codes are not applied to Limited Duty Officer (LDO) or Warrant Officer (WO) billets or personnel.

- (2) Subspecialty codes are not applied to Flag Officer billets.

(3) Master's level and higher education requirements normally will not be applied to Unrestricted Line shore duty billets below the grade of LCDR.

- (4) Doctor of Philosophy (PhD)

(a) Within the Unrestricted Line, PhD billet requirements will be validated only for 1000 or 1050 billet designator to reflect the primacy of the education level.

(b) PhD billet requirements expressed for the engineering science disciplines normally will be validated only within the Restricted Line and Staff Corps.

(5) "Proven Subspecialist" codes apply to Unrestricted Line, Restricted Line, and 2300/2900 designator for officers and billets in the grades of LT-CAPT; these codes are awarded to officers upon completion of qualifying billets.

NOTES:

⁽¹⁾ General: These codes describe fields unique to the various Staff Corps specialties. Staff Corps requirements outside these fields will be given the applicable functional field or the appropriate education/training/experience code.

⁽²⁾ The following criteria shall be used in the assignment of subspecialty codes to identify officers in the Medical Department.

Subspecialty 1 - Specialty in which an officer is currently fully credentialed and actively practicing as a primary duty, or the specialty for which the officer is in training. Trainees are not counted in specialty inventories.

Subspecialty 2 - Fully trained, may not be currently credentialed or actively practicing the specialty as a primary duty. Usually the specialty in which trained prior to attaining Subspecialty 1. May require refresher training to become fully credentialed.

Subspecialty 3 - Fully trained, may not be currently credentialed or practicing the specialty. Usually the specialty in which trained prior to attaining Subspecialty 2. May require lengthy refresher training to become fully credentialed.

⁽³⁾ This code (1800) indicates a billet requirement for a Health Care Administrator of the Medical Service Corps with the specified level of education and/or experience in health care administration or related management disciplines.

⁽⁴⁾ This code (1900) indicates a billet requirement for a Nurse Corps officer qualified in any of the disciplines included within the field with the level of education, training, or experience as specified by the suffix.

⁽⁵⁾ This subspecialty (1806) applies to any Medical Department designator.

⁽⁶⁾ This subspecialty (1308) no longer assigned to billets or personnel.

6. Subspecialty Code Billet Application

a. **Subspecialty Code Criteria.** Three types of criteria are evaluated when reviewing the SSP code justification provided on the Subspecialty Coding Validation Request form: (1) General; (2) Specific; and (3) Level. The requirement to satisfy these criteria in the process of assigning a SSP code to a billet is essential to the management and integrity of the SSP system. Where it is not clear that criteria have been met, further justification must be requested. An outline of General, Specific and Level criteria is shown below:

(1) **General Criteria** are defined by DCNO (N1) and subdivided into:

REQUIRED: a naval officer with either operational, technical or managerial experience (cannot substitute with a civilian, LDO, or Warrant Officer). Supervision over personnel with graduate education is required.

(2) **Specific Criteria**

Developed by the Subject Matter Expert and specific to each SSP field. Maintained by the Subject Matter Expert and updated at least biennially before the Subspecialty Validation Review.

(3) **Level Criteria** are defined by DCNO (N1) and unique to each suffix as described below.

b. Suffix Definitions

(1) Graduate Education Non-Proven Suffix

P, D, N-CODES: Requires theoretical knowledge that could not be acquired, under normal circumstances, as a result of progressive or selected assignments, attending short courses, or on-the-job training. This knowledge would be obtained in a formal educational regimen leading to a degree program that meets Educational Skill Requirements (ESRs).

G-CODES: Applies to unique Staff Corps subspecialty billets and personnel only. This knowledge would be obtained in a formal educational regimen leading to a degree program.

(2) Graduate Education Proven Suffix

C, M, Q-CODES: Applies only to Unrestricted Line Officer (URL), Medical, and Fleet Support (1700) officer billets in the grades of LCDR through CAPT. The billet must first satisfy the proper criteria for the SSP education at the base (non-proven subspecialist) level. In general, these billets require experienced senior (proven) officers of the SSP system. The billets should be considered as follow-on billets for basic SSP billets.

F- CODE: Applies to unique Staff Corps subspecialty billets and personnel only. The billet must first satisfy the proper criteria for the SSP education at the base (non-proven subspecialist) level. In general, these billets require experienced senior (proven) officers of the SSP system. The billets should be considered as follow-on billets for basic SSP billets.

(3) Doctorate Level Criteria. C and D coded billets:

D-CODE: Requires comprehensive knowledge of specific theories, principles, processes and/or techniques certified through the acquisition of the doctorate for optimum performance of duty; also requires the conception, implementation, appraisal, or management of exceptionally complex Navy and/or DoD programs.

C-CODE: All of the D-code criteria are applicable; additionally, the billet requires a proven subspecialist at the doctorate level.

(4) Post-Master's Degree Level Criteria. M and N coded billets.

(a) Engineer's Degree Level Criteria

N-CODE: Requires both engineering experience and comprehensive knowledge of scientific theories and engineering principles, processes and/or techniques certified through the acquisition of the engineer's degree for optimum performance of duty; also requires the conception, appraisal, or management of exceptionally complex Navy and/or DoD programs. The billet requires the application of the most modern techniques in certain scientific fields, such as: hydrodynamics, aerodynamics, fluid mechanics, thermodynamics, structural mechanics, nuclear physics, or electronics.

M-CODE: All of the N-code criteria are applicable; additionally the billet requires a proven subspecialist at the engineer's degree level.

(b) Other Post-Master's Degree Level Criteria

N-CODE: Requires significant educational experience and comprehensive knowledge of current theories and established principles, processes, and/or techniques certified through the acquisition of the post-master's degree for optimum performance of duty; also requires the conception, appraisal, or management of exceptionally complex Navy and/or DoD programs. These programs usually involve plans, policy, and/or decisions at the highest levels of military and/or government services. Additionally, the billet requires the application of the most modern techniques in certain fields, such as: intelligence, management, political-military science, strategic planning, applied logic, operations analysis, logistical analysis, operations systems, communications, computer technology, environmental science, or law.

M-CODE: All of the N-code criteria are applicable; additionally the billet requires a proven subspecialist at the post-master's degree level.

(5) Master's Degree Level Criteria. P and Q coded billets.

P-CODE: Requires extensive knowledge of theories, principles, processes and/or techniques certified through the acquisition of the master's degree for optimum performance of duty; also requires the conception, implementation, appraisal, or management of complex Navy and/or DoD programs.

Q-CODE: All of the P-code criteria are applicable; additionally the billet requires the combination of both professional experience and proven subspecialist at the master's degree level.

(6) Degree Program Not Meeting All Education Skill Requirements. F and G coded billets.

Applicable to unique Staff Corps subspecialty codes. F and G are used to denote officers who enroll in a degree program which does not fully meet the Navy Education Skill Requirement (ESR) criteria in a subspecialty.

F and G coded billets require theoretical knowledge obtained in a formal educational regimen leading to a degree program which may not meet all of the educational skill requirements. F-coded billets require a proven subspecialist at the G-coded level.

(7) Baccalaureate Level Criteria. E-coded billets.

E-CODE: Requires a basic knowledge of theories, principles, processes, and techniques certified through the acquisition of the baccalaureate degree with major concentration in the SSP field for optimum performance of duty; also requires the performance of analytical work, the compilation of related reports and/or the effective assembly of information essential for the implementation and management of Navy and/or DoD programs.

(9) Experience Level Criteria. R and S coded billets.

S-CODE: Requires the combination of professional experience and knowledge of theories, principles, processes, and/or techniques in the SSP field; also requires knowledge in the SSP field obtained through training or prior successful service in the SSP field.

R-CODE: All of the S-code criteria are applicable; additionally the billet requires a proven subspecialist at the experience level.

(10) Training. T coded billets.

T-CODE is for people only in OAIS while they are in training. Not applicable for billets.

(11) Immediate Graduate Education Program (IGEP). Immediate Graduate Education Program Graduates.

I-CODE: Assigned to all newly commissioned officers that obtain a Master's level education awarded through the completion of the Immediate Graduate Education Program at the Naval Postgraduate School, Air Force Institute of Technology, or affiliated schools. Officers will receive the specific subspecialty code for which they have completed coursework and the IGEP I-code suffix.

Requires broad knowledge of theories, principles, processes and/or techniques certified through the acquisition of the master's degree for optimum performance of duty; also requires the rudimentary conception, implementation, appraisal, or management of complex Navy and/or DoD programs.

Master's degree does not fully meet Navy criteria for a P-code in a degree program. Officers will retain I-code suffix associated with degree completion throughout careers. Officers may complete a utilization tour in a general or specific P-code billet, however officers will retain the I-code suffix for program tracking.

Not applicable to billets.

7. Subspecialty Suffixes.

<u>Suffix</u>	<u>Definition</u>
---------------	-------------------

- | | |
|---|--|
| B | Validated requirement for master's or higher level of education but second priority to P, Q, M, N, C, or D-coded billets; used when subspecialty code compensation has not been identified. Applies only to billets. |
| C | PhD level of education - <u>proven</u> subspecialist |
| D | PhD level of education |
| E | Baccalaureate level of education in a field applicable to the subspecialty. Assigned to billets in unique areas that need specific background to perform billet objectives. |
| F | Master's degree not fully meeting Navy criteria in a degree program - <u>proven</u> subspecialist (unique Staff Corps subspecialties). |
| G | Master's degree not fully meeting Navy criteria in a degree program (unique Staff Corps subspecialties). |
| I | Master's degree completed by Immediate Graduate Education Program graduates not fully meeting Navy criteria in a degree program. Applies only to officers. |
| J | Fully trained (Medical Only) |
| K | Board certified/Board equivalency certified (Medical Only) |
| M | Post-master's graduate degree level of education - <u>proven</u> subspecialist |
| N | Post-master's graduate degree level of education |
| P | Master's level of education |
| Q | Master's level of education - <u>proven</u> subspecialist |
| R | Significant experience - <u>proven</u> subspecialist |
| S | Significant experience |
| T | Denotes training billet which qualifies incumbent for an S-code |
| V | Formal preparation beyond basic professional education in a program approved by Bureau of Medicine and Surgery (Medical only) |

8. Recommendations to Establish, Delete or Revise Subspecialties

- a. Recommendations to establish a SSP code must include the following:
 - (1) Recommended SSP code and title.
 - (2) Any corresponding special requirements to be included in this manual or OPNAVINST 1000.16 series.
 - (3) List of designator(s) that can hold the SSP code, including minimum and maximum pay grades applicable to officers and billets.
 - (4) Funding implications including curriculum development, education skill requirements (ESR), instructor workload, Military Construction (MILCON), OPN costs, and student/training billets needed to maintain curriculum. Recommend command consult with Officer Policy and Programs Section (N71C) for guidance on ESRs.
 - (5) Number and location of billets by activity name, activity Unit Identification Code (UIC), Billet Identification Number (BIN), Billet Sequence Code (BSC), billet title, designator and grade, proposed SSP, any coding on the billet at this time, and minimum number of officers required at Naval Postgraduate School (NAVPGSCOL) to support a curriculum. Recommend command consult with the NAVPGSCOL and the Officer Subspecialty and Graduate Education Management Section (CNO N131E).

- (6) Information on how the qualifications are presently identified.
 - (7) The specific degree program required to earn this SSP. (This item is mandatory.)
 - (8) Problem areas (current and future).
 - (9) Justification: a statement as to why existing expressions (i.e., NOBC, AQD, SSP, grade, or designator) or current method of identifying the authorizations are insufficient without the proposed SSP code; other historical or amplifying information.
 - (10) Any Reserve implications.
 - (11) Major Area Sponsors and Subject Matter Experts.
 - (12) Point of contact (include telephone (both commercial and DSN) number, telefax number, and e-mail address).
- b. Recommendations to delete a SSP code must include the following:
- (1) Code number and title of the SSP to be deleted.
 - (2) Background, reason for deletion.
 - (3) Information on how to recode billets and personnel presently coded with this SSP:
 - (a) Billets. Recoding of billets should be done during the biennial revalidation process if possible. Include a Data Processing Services Request (DPSR) for recoding of billets if not done during the revalidation.
 - (b) Personnel. Personnel with this SSP will either be phased out through attrition or will transfer to another SSP. Include in request how you want the personnel with this SSP to be handled; pre-staff through the Professional Development Education and Subspecialty Branch (PERS-440).
 - (4) Indicate Reserve implications.
 - (5) Indicate extent of coordination with Major Area Sponsors, Subject Matter Experts, Claimants, etc. Recommend command consult with the NAVPGSCOL and the Officer Subspecialty and Graduate Education Management Section (CNO N131E).
 - (6) Point of contact (include telephone (both commercial and DSN) number, telefax number, and e-mail address).
- c. Recommendations to revise a SSP code must include:
- (1) Code number and title of SSP to be revised.
 - (2) Background, reason for revision.
 - (3) Recommended changes.
 - (4) Any corresponding special requirements to be included in this manual or the OPNAVINST 1000.16 series.
 - (5) List of designators that can hold the SSP code including minimum and maximum pay grades applicable to officers and billets.
 - (6) Funding implications including curriculum development, education skill requirements (ESR), instructor workload, MILCON, OPN cost, and student/training billets needed to maintain curriculum. Recommend command consult with Officer Policy and Programs Section (N71C) for guidance on ESRs.
 - (7) Number and location of billets by activity name, activity Unit Identification Code (UIC), Billet Identification Number (BIN), Billet Sequence Code (BSC), billet title, designator and grade, proposed SSP, any coding on the billet at this time, and minimum number of officers required at Naval Postgraduate School (NAVPGSCOL) to support a curriculum. Recommend command consult with the NAVPGSCOL and the Officer Subspecialty and Graduate Education Management Section (CNO N131E).
 - (8) Information on how the qualifications are presently identified.

(9) Education curriculum and ESR that support requirements.

(10) Problem areas (current and future).

(11) Justification: a statement as to why existing descriptors (i.e., NOBC, AQD, SSP, grade, or designator) or current method of identifying the requirements are insufficient without the proposed subspecialty code change; other historical or amplifying information.

(12) Any Reserve implications.

(13) Point of contact (include telephone (both commercial and DSN) number, telefax number, and e-mail address).

(14) Major Area Sponsors and Subject Matter Experts.

(15) Information on how to recode billets and personnel presently coded with this SSP:

(a) Billets. Recoding of billets should be done during the biennial review process if possible. Include a Data Processing Services Request (DPSR) for recoding of billets if not done during the revalidation.

(b) Personnel. Personnel with this SSP will either be phased out through attrition or will transfer to another SSP. Include in request how you want the personnel with this SSP to be handled; pre-staff through the Professional Development Education and Subspecialty Branch (PERS-440).

(16) Extent of coordination with Major Area Sponsors, Subject Matter Experts, Claimants, etc.

d. Submit recommendations to establish, revise or delete SSPs via the appropriate chain of command (include CNO (N131E) to Commanding Officer, Navy Manpower Analysis Center, ATTN: Code 10, 5720 Integrity Drive, Millington, TN 38054-5011.

LIST OF NOBC TITLES BY FUNCTIONAL AREA

PART C

NAVY OFFICER BILLET CLASSIFICATION (NOBC) CODES

1. General

a. Navy Officer Billet Classifications (NOBCs) identify officer billet requirements and officer occupational experience acquired through billet experience or through a combination of education and experience.

b. An NOBC provides a general description of duties performed in a billet. It is not meant to cover every duty required of the job nor is every duty listed necessarily a requirement of the billet. Similarly, an NOBC in an officer's record does not necessarily indicate that the officer has experience in every duty listed in the definition. The NOBC identifies a group of officer billets which are similar but not necessarily identical in scope and nature of duties.

c. Each NOBC consists of a four-digit code (see **EXCEPTION** below), a long title, an ADP short title and a definition. The first digit identifies the field, the second digit identifies the group within the field and the third and fourth digits indicate the specific billet classification within the group. NOBC titles and definitions reflect billet titles and several representative duties. **EXCEPTION:** Special NOBCs exist which identify certain flag officers and flag officer selectees. These NOBCs are four-character alphanumeric codes (A001, etc.) controlled by the Chief of Naval Operations (CNO). Direct any inquiries concerning these special NOBCs to CNO (N1F).

d. A need exists in certain personnel management operations for information concerning codes occupationally related to specific NOBCs. These codes, defined below, immediately follow the definition of each NOBC.

(1) **Related Codes.** The NOBCs listed aid in the selection of naval officers to fill mobilization billets. In the absence of officers with exact qualifying experience, the list of related codes provides alternate NOBCs enabling identification of officers who qualify for specific billets by virtue of related experience and/or training.

(2) **The DOD Group** identifies the group number and title in the Department of Defense Occupational Conversion Manual (DOD 1312.1 series) which corresponds to the NOBC. This manual, maintained by the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), compiles the occupational classifications of the armed forces under a common occupational grouping and numerical coding system.

2. Application

a. When applied to a billet, the NOBC is a general statement of duties performed in accomplishing some part of an activity's mission. When a single NOBC in combination with other information provided does not describe a billet adequately, use of a second NOBC provides further description. The allowed grade distinguishes billets which differ in degree of authority or responsibility but not in essential duties performed. Similarly, the same NOBC code identifies principal and assistant billets distinguishing between the two by adding the word "assistant" at the beginning of the billet title.

b. An NOBC entered in an officer's record reflects experience acquired as a result of performance in a billet or, in some instances, a combination of experience and education related to the billet's requirement. A combination of experience and education gained through Reserve participation and certified by designated authority is a basis for updating the classifications in an officer's record.

3. Assignment

a. Assignment of an NOBC on all officer billets is mandatory. OPNAVINST 1000.16 series provides procedures for submitting changes to Manpower Authorizations.

b. For active duty officers the NOBC code appearing in the first NOBC column of an Officer Distribution Control Report (ODCR) transfers automatically to an officer's record upon assignment to a billet identified by that NOBC. But, the code is removed from the officer's record if the officer is in the billet for less than five months. An officer's automated record holds a maximum of 30 NOBCs reflecting the officer's most recent billet experience. Volume II of this manual provides procedures for submitting corrections to an officer's data card.

c. For inactive duty Naval Reserve officers. Analysis of information contained in the officer's qualifications records maintained by the Naval Reserve Personnel Center (NAVRESPERSCEN) is the basis for assigning NOBC codes to inactive duty Naval Reserve officers. The Inactive Officer Master File (IOMF), because of its limitations, displays only the latest four NOBCs attained for:

- (1) civilian occupational experience and education as reported on the Annual Qualifications Questionnaire,
- (2) active duty experience as reported on the Officer Data Card, and
- (3) experience and education attained through Reserve participation when evaluated and certified by designated authority.

NAVRESPERSCEN (Code 22) maintains all other NOBCs on file. Submit requests for new NOBC certification via the chain of command to NAVRESPERSCEN (Code 22) using the format and criteria contained in BUPERSINST 1001.39 series.

4. Justification to Establish and/or Retain NOBCs. To establish and/or retain a code within the NOBC structure, an NOBC should meet the following criteria:

a. It describes the qualitative requirements of existing or proposed billets in Manpower Authorizations and Officer Distribution Control Reports.

b. It applies in planning, personnel control, career management, education and training, or manpower information functions.

c. It applies Navy-wide and does not reflect purely local conditions or organization unless it is necessary to meet the criteria stated in paragraph 4b.

d. It does not duplicate an existing code.

e. It identifies billets, both peacetime and mobilization, and officer experience, both active and inactive.

f. It identifies a minimum of 15 billets.

g. Definitions should be concise and preferably limited to fifty words. They should be broad enough to identify all billets with similar requirements, yet narrow enough to distinguish significant differences not identified through other codes (e.g., designator, grade and activity). Definitions should stress what is done rather than how or why it is done. They should not include duties required of all officers, such as training of subordinates or preparing routine reports, unless such duties are a distinct requirement of the billet.

5. Recommendations to Establish, Delete or Revise NOBCs

a. To make sure NOBCs continue to reflect current technological and administrative developments, commands and officers are invited to review and evaluate these classifications and, if appropriate, submit recommendations for improvement. An activity recommending a new NOBC should first ensure that an established NOBC in its present form, or with some revision, will not suffice for identifying the occupational aspects of the billets involved. Commands recommending establishing, deleting or revising NOBCs should consider the criteria listed in paragraph 4 above. Additionally, all recommendations should include the appropriate information as follows:

(1) Recommendations to establish NOBCs must include:

- (a) Recommended code number, long title and short title. The maximum length for the short title is 14 spaces, including blank spaces.
- (b) Recommended definition (preferably limited to fifty words);
- (c) Number and location of billets by activity type that the proposed NOBC will identify;
- (d) Designators and grades applicable to the proposed code;
- (e) List of special training required for the incumbent officer (include length and type of course(s) and/or on-the-job training);
- (f) Information on how the requirements/qualifications are currently identified;
- (g) Justification stating why the existing billet descriptors are insufficient without the proposed NOBC, and other historical or amplifying information necessary for prudent consideration at each level of review; and
- (h) Point of contact (include telephone (both commercial and DSN number, telefax number, and e-mail address).

(2) Recommendations to delete NOBCs must include:

- (a) Code and title of existing NOBC;
- (b) Reason(s) for deleting the code (e.g., qualifications duplicated by another code, insufficient billets to meet the criterion in paragraph 4.f. above) and any other information needed for consideration at each level of review;
- (c) Information on which NOBC(s), if any, will absorb the duties of the code;
- (d) Information on how to recode the billets and officers, if appropriate, presently coded with this NOBC;
- (e) Point of contact.

and

(3) Recommendations to revise NOBCs must include:

- (a) Code and title of existing NOBC;
- (b) Proposed recoding, retitling and/or rewording of the current NOBC;
- (c) Justification for the proposed revision(s); and
- (d) Point of contact.

b. Submit all recommendations according to the procedures outlined in the introduction of this manual.

HEALTH CARE SERVICES FIELD

0000-0999

This field includes classifications which identify billets with primary duties involving research and planning, providing, and administering medical, surgical, dental, and nursing services; and classifications in related health care sciences and services.

MAJOR GROUPS

0000-0099 HEALTH SERVICES MANAGEMENT GROUP

0100-0199 MEDICAL SPECIALTIES (MEDICINE) GROUP

0200-0299 MEDICAL SPECIALTIES (SURGERY) GROUP

0300-0399 GENERAL DENTISTRY GROUP

0500-0599 DENTAL SPECIALTIES GROUP

0800-0899 HEALTH CARE SERVICES GROUP

0900-0999 NURSING GROUP

HEALTH SERVICES MANAGEMENT GROUP

0000-0099

Classifications in this group identify primary duties associated with management, oversight, control, and administration of Medical Department staff and health care systems.

0002 MEDICAL DEPARTMENT STAFF OFFICER [MED DPT STF]

Advises commander on all Medical Department units, personnel and material. Provides professional and administrative support to Medical Department officers. Acts as liaison between commands.

Related Codes: NOBC - NONE; DOD Group - 6I Health Services Administration
Officers

NOTE - This NOBC does not apply to medical treatment facilities.

0005 DIRECTOR, HEALTH SERVICE OR PROGRAM [DIR HS/PGM]

Directs and administers a major directorate within a health services command or headquarters activity. Plans, programs and directs the designated service or program. Advises commanding officer on content and quality of service or program.

Related Codes: NOBC - 0010, 0020; DOD Group - 6I Health Services Administration
Officers

NOTE - This NOBC applies to Chief of Medical Staff, Director of Ancillary Services, Director of Administrative Services and Director of Nursing Services.

0010 CHAIRMAN OF DEPARTMENT, TEACHING PROGRAM [CHAIRDPT T PGM]

Administers a clinical teaching service. Supervises training of interns, residents, fellows and treatment of patients within the professional service. Advises commanding officer of status of patient's physical condition, progress under treatment and prognosis. Determines degree of incapacitation sustained and further disposition of patients. Recommends changes in equipment and services. Maintains appropriate standards and documentation to ensure accreditation of training programs.

Related Codes: NOBC - 0020; DOD Group - 7B Training Administrators

0020 HEALTH SERVICES DEPARTMENT HEAD [HS DPTH]

Manages a health services department ashore or afloat. Implements organization policies and procedures. Manages material, fiscal, manpower, and personnel resources within the department. Provides systems for quality assurance, staff development and performance evaluation.

Related Codes: NOBC - NONE; DOD Group - 6I Health Services Administration Officers

NOTE - This NOBC applies to all Medical Department corps.

0026 HEALTH SERVICES BRANCH CLINIC DIRECTOR [HS BR CL DIR]

Directs operation of the branch clinic to ensure delivery of high quality care. Ensures compliance with command policies, directives, regulations, and instructions. Maintains liaison with supported commands. Conducts periodic inspections to ensure operational and clinical efficiency.

Related Codes: NOBC - 0020, 9420; DOD Group - 6I Health Services Administration Officers

NOTE - For OIC Branch Clinic, use NOBC 9420.

0028 HEALTH SERVICES DIVISION OFFICER [HS DIV OFF]

Supervises the operation and personnel of a division within a health services department. Provides for the orientation, training, and evaluation of divisional personnel. Ensures safe environment for patients and personnel. Coordinates divisional operation with other divisions and departments. Provides input for department planning and programming.

Related Codes: NOBC - NONE; DOD Group - 6I Health Services Administration Officers

2700-2799 SECURITY AND POLICE

PHYSICAL AND NATURAL SCIENCES GROUP

2000-2099

Classifications in this group identify primary duties associated with physical and natural sciences, including mathematics, statistics, physics, chemistry, aerospace, and materials engineering.

2050 MATHEMATICS RESEARCH OFFICER [MATH RSCH]

Develops mathematical techniques and formulas for computation and measurement of physical reactions. Develops methods by which quantities sought are deductible from known or supposed quantities. Collaborates in design and testing of computers and other mathematical devices. Solves problems of mathematical theory involving derivation of calculation processes. Exercises administrative and professional direction of naval research in mathematics.

Related Codes: NOBC - 2085; DOD Group - 5J Mathematicians and Statisticians

2060 PHYSICAL SCIENCES RESEARCH OFFICER [PHYS SCI RSCH]

Directs and participates in physical sciences research program. Initiates and conducts research programs. Coordinates support of research projects. Provides advice and information on physical sciences aspects of naval operations and planning. Controls research projects conducted under contract. Collaborates with other agencies in research.

Related Codes: NOBC - 2070, 2090; DOD Group - 5L Research and Development Coordinators

2070 PHYSICIST, GENERAL [PHYSIC GEN]

Directs or conducts research in one or more phases of physics. Analyzes and tests physical properties of materials, including matter affecting living organisms. Applies results of experiments to solution of problems. Collaborates in research and development projects of audiocommunication equipment and facilities. Consults with design and development representatives regarding potential and limitations of nuclear energy. Develops new therapeutic techniques and equipment. Manages research projects under contract to industrial firms.

Related Codes: NOBC - 2071; DOD Group - 5A Physical Scientists

2071 PHYSICIST, NUCLEAR [PHYSIC NUC]

Directs and conducts research in the nature and characteristics of atomic nuclei. Measures particles emitted in disintegration of nuclei to determine structure, energy levels, decay rate and other properties. Examines properties and structure of radioactive isotopes to discover military applications. Develops improved methods of radiation protection.

Related Codes: NOBC - 2070; DOD Group - 5A Physical Scientists

2085 STATISTICAL DATA ANALYST [STAT DATA ANAL]

(For 3-M Data Analyst, see NOBC 2642; for Computer Systems Analyst, see NOBC 9735) Performs professional statistical work involving collection, compilation, verification, analysis, and interpretation of data to aid in logistical planning, scientific research, and management control. Obtains basic data, determining character and volume of information necessary for solution of statistical problems. Analyzes quantitative statistical data. Develops significant trends and ratios and evaluates trends and correlations to determine cause-effect relationships. Selects methods of presenting findings such as charts, diagrams and written summaries.

Related Codes: NOBC - 2050; DOD Group - 5J Mathematicians and Statisticians

2090 CHEMIST [CHEMIST]

Directs or conducts research in chemistry. Conducts and advises on research in chemistry having military and/or medical application, such as protection of personnel from chemical, biological, and radiological agents; development, handling, and use of improved petroleum and synthetic fuels and lubricants; and purification and control of atmosphere as on nuclear submarines. Effects synthetization of special compounds. Maintains liaison with and monitors projects under contract to universities or industrial firms.

Related Codes: NOBC - 0840; DOD Group - 5A Physical Scientists

2098 SPACE PROJECTS TECHNOLOGIST [SPACE PJ TECH]

Directs or serves as Navy technical assistant, consultant, or adviser in various space projects. Serves as representative to cognizant organizations and installations, including private contractors, other armed services and the National Aeronautics and Space Administration. MAJOR GROUPS

4200-4299 SHORE FACILITIES ENGINEERING

4300-4399 NAVAL CONSTRUCTION FORCES

SHORE FACILITIES ENGINEERING GROUP

4200-4299

Classifications in this group identify primary duties involving shore facilities research, planning, design, construction, and maintenance; facilities related staff functions; and matters pertaining to the Petroleum and Oil Shale Reserves. Excluded from this group are classifications pertaining to nuclear shore system facilities which are contained in the 4700-4799 group.

4205 FACILITIES ENGINEERING OFFICER [FAC ENG]

Directs or assists in the formulation and execution of facilities engineering programs at headquarters or field division level. Coordinates or participates in planning, research, design, construction and maintenance of facilities. Directs programs concerned with utilities procurement, and control of automotive, construction and weight handling equipment. Plans and coordinates acquisition, management and disposal of real estate and housing. Develops administrative and training policies for employment and support of the construction forces.

Related Codes: NOBC - 4210, 4215; DOD Group - 4A Construction and Utilities

4210 STAFF FACILITIES ENGINEER [STF FAC ENG]

Advises and assists commander on Civil Engineer Corps matters. Provides civil engineering advice and recommendations on matters pertaining to naval facilities, public works and public utilities. Develops and disseminates facilities engineering doctrine. Conducts advance base development and facilities planning. Formulates and reviews military construction programs. Determines facilities requirements. Prepares facilities operation and maintenance budgets. Provides liaison between command and the appropriate Naval Facilities Engineering Command Field Division.

Related Codes: NOBC - 4215, 4230; DOD Group - 4A Construction and Utilities

4215 FACILITIES PLANNING AND PROGRAMMING OFFICER [FACPLN & PGM]

Directs or assists in the formulation of shore facilities plans and programs and in the development and review of military construction projects. Coordinates and plans the development and support of military construction programs. Maintains technical liaison with systems commands and fleet commands on facilities logistic problems.

Related Codes: NOBC - 4210, 4230; DOD Group - 4A Construction and Utilities

4220 FACILITIES DESIGN OFFICER [FAC DSGN]

Directs or assists in the architectural and engineering design of new construction, alterations and repair of shore facilities. Prepares plans, specifications and contract documents. Negotiates with architect-engineer firms. Reviews designs and participates in special engineering investigations and projects.

Related Codes: NOBC - 4225, 4230; DOD Group - 4A Construction and Utilities

4225 FACILITIES RESEARCH OFFICER [FAC RSCH]

Directs or participates in shore facilities and underwater construction research and development programs. Investigates and evaluates practical applicability of facilities design and construction. Conducts research into improved maintenance methods and procedures. Determines material suitability.

Related Codes: NOBC - 4215, 4220; DOD Group - 4A Construction and Utilities

4230 FACILITIES CONSTRUCTION/FACILITIES SERVICES OFFICER [FAC CONST/SVC]

Directs the design, construction, alteration, maintenance, repair of, and base operating services for shore facilities. Supervises preparation of plans and specifications. Administers competitive bid and contract award; supervises contract performance. Approves design, contract modification during construction, and provision of contract services. Ensures compliance with labor regulations. Recommends acceptance of completed facilities or services.

Related Codes: NOBC - 4275; DOD Group - 4A Construction and Utilities

4240 PETROLEUM PRODUCTION ENGINEERING OFFICER [PET PROD ENG]

Directs and administers activities and projects pertaining to the Naval Petroleum and Oil Shale Reserves. Administers operating contracts and unit agreements governing land within the Naval Petroleum and Oil Shale Reserves. Manages and directs engineering projects and operations concerned with exploration, drilling, production and preservation of the Naval Petroleum and Oil Shale Reserves. As required, directs restoration of fields damaged by war or natural disaster.

Related Codes: NOBC - NONE; DOD Group - 4N Engineering and Maintenance Officers - Other

4250 PUBLIC WORKS OFFICER [PWO]

Directs and administers public works and public utilities at naval activities. Supervises or participates in facilities planning, design, construction and maintenance. Provides for installation and maintenance of public utilities. Provides transportation services. Conducts inspections of facilities and projects for conformance to safety, maintenance and other naval regulations.

Related Codes: NOBC - 4210, 4255; DOD Group - 4A Construction and Utilities

4255 PUBLIC WORKS OPERATIONS OFFICER [PW OPS]

Provides engineering supervision and direction to the shop forces of public works department or center. Coordinates the maintenance, transportation and utilities functions, allocating resources in accordance with command priorities. Maintains liaison between public works component and other components of the activity in regard to public works matters.

Related Codes: NOBC - 4260, 4265, 4270; DOD Group - 4A Construction and Utilities

4260 PUBLIC WORKS MAINTENANCE OFFICER [PW MTN]

Directs planning and scheduling of repair of activity buildings, utilities, grounds, roads, waterfront structures and other facilities. Determines need for routine and emergency repair, maintenance, or modification of sewage systems, railroad tracks, piers, tanks, shipbuilding ways, docking facilities and construction equipment. Directs execution of authorized projects. Ensures timely and satisfactory completion of assigned projects.

Related Codes: NOBC - 4255, 4270; DOD Group - 4A Construction and Utilities

4265 PUBLIC WORKS TRANSPORTATION OFFICER [PW TRANS]

Directs transportation operations and maintenance of naval shore activity. Develops policies and procedures pertaining to the use and operation of railroad, automotive, construction, mobile firefighting and other assigned equipment. Supervises the operation of transportation shops and garages and the maintenance, overhaul and repair of transportation equipment.

Related Codes: NOBC - 4255; DOD Group - 8C Transportation

4270 PUBLIC WORKS UTILITIES OFFICER [PW UTIL]

Directs operation, maintenance and repair of public utilities at naval shore activity. Ensures efficient operation of central plant, electric and hydraulic substations and distribution systems for steam, electricity, compressed air, water and gas. Establishes policies and procedures regarding personnel, inspections and equipment operation and maintenance. Directs or conducts special studies to increase efficiency of power production and use.

Related Codes: NOBC - 4255, 4260; DOD Group - 4A Construction and Utilities

4275 PUBLIC WORKS PLANNING OFFICER [PW PLN]

Directs the facilities planning, design and maintenance control programs. Translates command policy guidance on funds and facilities into plans for accomplishment by shop forces or contract. Inspects public works and public utilities as to maintenance needs. Prepares manpower and material estimates for job orders. Directs preparation of contract drawings and specifications.

Related Codes: NOBC - 4230, 4255; DOD Group - 4A Construction and Utilities

NAVAL CONSTRUCTION FORCES GROUP

4300-4399

Classifications in this group identify primary duties involving the administration and operation of the naval construction forces system which is primarily concerned with the construction and maintenance of shore and waterfront facilities (fixed and movable) at advanced bases.

4305 COMMANDING OFFICER, NAVAL CONSTRUCTION FORCES [CO CONST FOR]

Commands an organization of the Naval Construction Forces in accordance with law, regulations and customs of the service. Develops or supervises development of organizational plan for accomplishment of assigned mission. Directs and coordinates the execution of all phases of the assigned construction plan. Takes appropriate action to attain and maintain the prescribed state of unit readiness. Provides for effective administration, discipline, training and welfare of the personnel of the command.

Related Codes: NOBC - 4205, 4310, 4315; DOD Group - 4A Construction and Utilities

4310 EXECUTIVE OFFICER, NAVAL CONSTRUCTION FORCES [XO CONST FOR]

Assists the commanding officer in establishing and maintaining the military and professional efficiency of a unit of the Naval Construction Forces such as brigade, regiment, or battalion. Enforces policies and procedures established by commanding officer or higher headquarters. Supervises administrative matters. Supervises execution of assigned construction plan and appraises commanding officer of status of projects and of problems encountered.

Related Codes: NOBC - 4205, 4315; DOD Group - 4A Construction and Utilities

4315 OPERATIONS OFFICER, NAVAL CONSTRUCTION FORCES [OPS CONST FOR]

Plans and directs the operations of a unit of the Naval Construction Forces such as a brigade, regiment, or battalion. Plans and coordinates execution of assigned construction plan. Determines personnel and materials requirements. Develops construction schedule. Provides engineering and testing services and inspects work in progress. Plans and supervises training programs.

Related Codes: NOBC - 4310, 4330; DOD Group - 4A Construction and Utilities

4330 COMPANY OFFICER, NAVAL CONSTRUCTION FORCES [CMPNY OFF NCF]

Commands or serves in a company within the Naval Construction Forces. Supervises execution of assigned construction projects. Ensures required state of readiness of unit personnel, equipment and material. Directs or supervises the administration, discipline, training and welfare of the unit personnel.

Related Codes: NOBC - 4260, 4265; DOD Group - 4A Construction and Utilities

4340 OFFICER IN CHARGE, NAVAL CONSTRUCTION BATTALION UNIT [OIC CBU]

Directs and coordinates the operations of a Naval Construction Battalion Unit. Initiates and implements action required to carry out assigned mission. Ensures required state of readiness of unit. Directs or supervises the administration, discipline, safety, training and welfare of unit personnel and promotes morale. Supervises preparation of, or reviews, construction plans, specifications and schedules. Provides civil engineering advice and recommendations on engineering design of new construction, alterations and repair of shore facilities.

Related Codes: NOBC - 4260, 4330; DOD Group - 4A Construction and Utilities

4350 OFFICER IN CHARGE/ASSISTANCE OFFICER IN CHARGE, COMBAT SERVICE SUPPORT TEAM [OIC/AOIC CSST]

Plans, directs, and coordinates the operations of a Naval Special Warfare Combat Service Support Team, or closely related Special Mission Unit (SMU), engaged in continuous direct support of Special Operations Force (SOF) missions. Serves as primary liaison between Naval Special Warfare and the Naval Construction Forces and coordinates external augmentation support as required for joint operations. Determines personnel, material, transportation, forward logistics, and contingency engineering requirements necessary to sustain Naval Special Warfare operations. Member of the Acquisition Work Force. Directs and supervises the administration, training and safety of team and unit personnel.

Related Codes: NOBC – 1215, 1272, 4315, 9051; DOD Group – 4N Engineering and Maintenance Officers - Other

ELECTRONICS ENGINEERING FIELD

5000-5999

This field includes classifications which identify primary duties involving research, design and development, installation, utilization and maintenance of electronic equipment, systems and training devices.

MAJOR GROUPS

5700-5799 TRAINING DEVICES

5900-5999 GENERAL

TRAINING DEVICES GROUP

5700-5799

Classifications in this group identify primary duties involving planning, design and development, installation, utilization, and maintenance of training devices.

5761 TRAINING DEVICE PROGRAM COORDINATOR [TRADEV PC]

Coordinates and controls training device programs and/or major individual projects through research, design, development, production, evaluation, installation and logistic support. Directs initiation and execution of research and development programs required by Navy operational and training programs. Assures satisfactory and timely completion of work. Advises on training device programs' technical policies. Conducts liaison with training agencies and field user activities relative to training device programs.

Related Codes: NOBC - 3215-3219; DOD Group - 4N Engineering and Maintenance Officers - Other

GENERAL GROUP (ELECTRONICS ENGINEERING FIELD)

5900-5999

Classifications in this group identify primary duties involving planning, research, design and development, installation, maintenance, and repair of electronic equipment and systems.

5904 ELECTRONICS ENGINEERING OFFICER [ELX ENG]

Directs electronics office of naval shore activity. Provides technical and engineering assistance to all elements of the activity in solution of electronic engineering problems. Directs design, installation and testing of electronic equipment. Advises on technical aspects of methods and procedures to achieve coordination between electronic and other work of activity. Ensures satisfactory and timely accomplishment of work. Provides for proper inspection of all electronics system installations. Supervises administrative functions of electronics office.

Related Codes: NOBC - 5925, 5977, 5996; DOD Group - 4B Electrical/Electronic

5913 ELECTRONIC ENGINEERING PLANS AND POLICIES DIRECTOR [ELX P&P DIR]

Exercises policy direction and control over particular phases of electronics engineering such as design and development, electronics logistics, ships and amphibious applications, or shore electronic facilities. Assists, as assistant director or special assistant, in such direction and control. Coordinates electronic activities within naval field establishment.

Related Codes: NOBC - 5965, 5970, 5980; DOD Group - 4B Electrical/Electronic

5917 ELECTRONIC EQUIPMENT RESEARCH OFFICER [ELXEQ RSCH]

Directs or participates in research, design, and development of electronic equipment. Analyzes design factors, and prepares integrated programs of design and development. Prepares equipment and installation design specifications. Supervises or participates in preparation of plans, specifications and drawings for electronic equipment. Assists in

preparation and defense of budgetary estimates for electronics programs. Confers with representatives of systems commands, other governmental agencies and private contractors on research, design and development problems.

Related Codes: NOBC - 5970, 5980; DOD Group - 4B Electrical/Electronic

5925 ELECTRONICS INSTALLATION AND MAINTENANCE PLANNING OFFICER (GENERAL) [ELX I&M PLNGEN]

Directs and coordinates installation and maintenance planning of electrical and electronic equipment and systems. Develops or approves diagrams and plans for installation and maintenance of new equipment. Directs accomplishment of field modifications and preparation of engineering procedures and standards for installation and maintenance of gear. Reviews and takes action on alteration requests submitted by ships, aircraft and installation activities.

Related Codes: NOBC - 5904, 5977; DOD Group - 4B Electrical/Electronic

5927 ELECTRONICS INSTALLATION AND MAINTENANCE PLANNING OFFICER (AVIATION) [ELX I&M PLN AV]

(For definition, see NOBC 5925)

Related Codes: NOBC - 5961; DOD Group - 4B Electrical/Electronic

5930 SPACE REQUIREMENTS ANALYST [SPACERQMT ANAL]

Analyzes current space technology and evaluates operational effectiveness of navigation, communication and ocean surveillance satellite systems. Establishes and coordinates requirements of Navy space systems. Provides advice and information on physical sciences aspects of naval operations planning. Collaborates with other armed services and agencies on engineering standards, space frequency utilization, modulation techniques and multiplexing schemes. Evaluates results of spacecraft and terminal testing.

Related Codes: NOBC - 2098, 5904; DOD Group - 5A Physical Scientists

5960 ELECTRONIC INSPECTION AND SURVEY OFFICER [ELX INSP&SRVY]

Inspects electronic equipment on ships and aircraft, recommending disposition based on predetermined performance standards. Inspects electronic equipment on new construction, determining conformance to specifications. Conducts inspections on active and reserve craft, determining material readiness. Reports to Board of Inspection and Survey on status of equipment, maintenance and preservation. Recommends survey of equipment considered obsolete or worn beyond economical repair. Suggests design changes to meet anticipated operational demands.

Related Codes: NOBC - 5904; DOD Group - 4B Electrical/Electronic

5961 AIRCRAFT ELECTRONICS DIRECTOR [A/C ELX DIR]

Exercises engineering coordination and control over aircraft electronic and electrical equipment through stages of design, development, test, production and installation. Directs initiation and execution of programs as necessitated by naval aviation engineering and operational programs. Advises on electronics technical policies. Exercises technical control over field activities concerned with test and evaluation. Administers budget.

Related Codes: NOBC - 5927; DOD Group - 4B Electrical/Electronic

5965 ELECTRONICS LOGISTICS OFFICER [ELX LOG]

Conducts or directs technical planning to establish and fulfill requirements for electronic equipment and personnel. Reviews logistic plans and advises on electronics personnel, material, facilities and functional components needed. Prepares and promulgates standardized composition and outfitting lists for forward area electronic units. Coordinates naval requirements for electronic equipment, establishing and promulgating allowance lists and adjusting priorities to meet operational urgencies. Prepares directives to systems commands concerning procurement, priorities, disposition, or transfer of electronic equipment.

Related Codes: NOBC - 5996; DOD Group - 8A Logistics, General

5970 ELECTRONIC EQUIPMENT MILITARY CHARACTERISTICS OFFICER [ELXEQ MIL CHAR]

Coordinates design of electronic equipment with operational needs of the fleet. Defines basic objectives of research, design and development of electronic equipment such as radar, sonar, radio, navigational aids and training aids. Reviews operational requirements and determines military features needed. Determines physical limitations such as power, space, weight and manpower requirements of equipment and establishes electronic characteristics and restrictions. Collaborates with other services in equipment design and characteristics functions.

Related Codes: NOBC - 5917, 5980; DOD Group - 4B Electrical/Electronic

5977 ELECTRONIC EQUIPMENT INSTALLATION, MAINTENANCE, AND REPAIR OFFICER [ELX INSTL&RP]

Supervises installation, maintenance and repair of electronic equipment and systems. Supervises maintenance of equipment and work of shops engaged in repair, including radio, sonar, navigational aids, IFF, special devices and cryptographic, communication security and computer equipment. Plans schedules for repairs or services. Inspects and ensures readiness of equipment. Directs maintenance of adequate stocks of spare parts, accounting for classified equipment utilized. Renders technical assistance on shop and shipboard repair work.

Related Codes: NOBC - NONE; DOD Group - 4B Electrical/Electronic

5980 ELECTRONICS RESEARCH ADMINISTRATOR [ELX RSCH ADMIN]

Directs research activities for development of electronic equipment and systems. Reviews projects to determine application of Navy needs. Initiates and administers accepted projects. Coordinates research efforts between systems commands and private contractors, evaluating progress of projects. Advises scientific personnel on general requirements and developments completed for service use. Arranges for administrative services as needed.

Related Codes: NOBC - 5913, 5917, 5970; DOD Group - 5L Research and Development Coordinators

5996 STAFF ELECTRONIC MATERIAL OFFICER [STF ELX MTL]

Assists staff commander by administering electronic material program for operational commands. Prepares and promulgates to ships of command operating and maintenance instructions for electronic equipment. Assists ships in obtaining allowance of equipment. Inspects ships to ascertain that equipment is properly maintained. Reviews latest alterations, modifications and arrangement plans issued by systems command, directing compliance by ships of command. Coordinates local repair activities to accommodate workload for electronic repairs. Advises on problems pertaining to electronic equipment.

Related Codes: NOBC - 5965, 5977, 9283; DOD Group - 4B Electrical/Electronic

WEAPONS ENGINEERING FIELD

6000-6999

This field includes classifications which identify billets with primary duties involving research in, and development and production of, naval weapons and weapons materials and the installation and maintenance thereof.

MAJOR GROUPS

6000-6099 AMMUNITION AND EXPLOSIVES

6200-6299 GUIDED MISSILES

6300-6399 WEAPONS EQUIPMENT

6400-6499 WEAPONS CONTROL

6500-6599 UNDERSEA WEAPONS

6700-6799 WEAPONS MATERIAL AND PROGRAMS

6900-6999 GENERAL

AMMUNITION AND EXPLOSIVES GROUP

6000-6099

Classifications in this group identify primary duties associated with ammunition, explosives, warheads, fuses, bombs, projectiles, signalling and illuminating pyrotechnic materials, and chemical munitions.

6083 AMMUNITION MATERIAL OFFICER [AMMO MTL]

Directs and supervises handling, storage, inspection, testing, preservation, overhaul, reworking, preparation, breakdown and stock maintenance of ammunition. Directs scheduling, identification, dispatching, marking, loading and unloading of outgoing and incoming ammunition of all types. Supervises fuzing and defuzing of projectiles. Enforces safety regulations. Prescribes engineering practices to be used. Supervises upkeep of magazines, shell houses, transfer depots, loading plants and storehouses.

Related Codes: NOBC - 9252; DOD Group - 4E Ordnance

6090 SURFACE MUNITIONS PROJECT OFFICER [SURF MUN PJ]

Administers surface munitions project within defined boundaries of time, resources and performance requirements. Prepares master plan, including schedules, costs and scope of all work and resources required. Initiates overall plans for production of end products, systems and subsystems. Monitors integrated logistic support requirements. Monitors contract negotiations and approves proposed contractual actions required for accomplishment of project. Evaluates progress. Coordinates changes to scope, timing and cost with functional organizations. Controls logistic support functions. Approves design changes to support equipment, as appropriate.

Related Codes: NOBC - 6968, 6982; DOD Group - 4E Ordnance

GUIDED MISSILES GROUP

6200-6299

Classifications in this group identify primary duties associated with the development of guided missiles, pilotless aircraft, drones, and associated equipment.

6275 GUIDED MISSILE TEST OFFICER [GM TEST]

Supervises installation, operation and maintenance of equipment and conducts test firing of guided missiles from ship or range. Directs handling, fueling, servicing and firing of missiles. Coordinates range facilities such as communications, telemetering, ballistic tracking cameras and radar. Locates and directs salvage of missiles and classified component equipment. Collects, analyzes and interprets data secured from missiles during flight. Controls aircraft and surface vessel movements as officer in charge of operational activities during ship launching. Directs safety program for missile range.

Related Codes: NOBC - 6280-6282, 8659; DOD Group - 2F Missiles

6280 GUIDED MISSILE TYPE PROJECT OFFICER (GENERAL) [GM PJ GEN]

Plans and administers projects for design and development of guided missile types. Establishes and maintains projects for development of ship-launched and air-launched guided missiles, assault drones, high-altitude test vehicles, meteorological units, guided missile jet engines and countermeasures. Supervises engineering of such weapons, including experimental models, recommending suitability for production. Administers budget and contracts for engineering work. Directs field development and testing.

Related Codes: NOBC - 6281, 6282; DOD Group - 5L R&D Coordinators

6281 GUIDED MISSILE TYPE PROJECT OFFICER (AIR-LAUNCHED) [GM PJ ALNCH]

(For definition, see NOBC 6280)

Related Codes: NOBC - 6280, 6282; DOD Group - 5L R&D Coordinators

6282 GUIDED MISSILE TYPE PROJECT OFFICER (SHIP-LAUNCHED) [GM PJ SHP-LNCH]

(For definition, see NOBC 6280)

Related Codes: NOBC - 6280, 6281; DOD Group - 5L R&D Coordinators

WEAPONS EQUIPMENT GROUP

6300-6399

Classifications in this group identify primary duties associated with guns, mounts, launchers, and related weapons equipment.

6305 ARMAMENT PROOF OFFICER [ARM PROOF]

Directs armament proof activities, firing tests and experimental trials. Directs testing of major and medium caliber guns and mechanisms, machine guns, rocket launchers, cases, primers and aircraft weapons. Establishes operating procedures to secure data required. Prepares reports on material undergoing tests based on analysis of collected data. Establishes and maintains safety precautions and programs required to protect material and personnel.

Related Codes: NOBC - 2050; DOD Group - 4E Ordnance

6380 WEAPONS EQUIPMENT PROJECT OFFICER [WEP EQ PJ]

Administers weapons equipment project within defined boundaries of time, resources and performance requirements. Prepares master plan, including schedules, costs and scope of all work and resources required. Initiates overall plans for production of end products, systems and subsystems. Monitors integrated logistic support requirements. Approves proposed contractual actions required for accomplishment of project. Evaluates progress. Coordinates changes to scope, timing and cost with functional organizations. Controls logistic support functions. Approves design changes to support equipment as appropriate.

Related Codes: NOBC - 6920; DOD Group - 4E Ordnance

WEAPONS CONTROL GROUP

6400-6499

Classifications in this group identify primary duties associated with fire control equipment and systems, including optical repair.

6457 FIRE CONTROL INSPECTION AND REPAIR OFFICER [FC INSP&REPAIR]

Administers repair, alteration, and inspection of fire control equipment. Directs or conducts tests and inspections. Determines need for repairs to equipment in use and recommends repairs to improperly or inaccurately operating equipment. Supervises equipment maintenance. Participates in arrival conferences and schedules fire control repairs for vessels in accordance with approved work requests, priorities, and availability of personnel and facilities. Provides technical assistance on repair, modification, and new installations.

Related Codes: NOBC - 6978; DOD Group - 4E Ordnance

6470 WEAPONS CONTROL SYSTEMS PROJECT OFFICER (GENERAL) [WEPCTL SYSPJ G]

Administers weapons control systems project within defined boundaries of time, resources and performance requirements. Prepares master plan, including schedules, costs and scope of all work and resources required. Initiates overall plans for production of end products, systems and subsystems. Monitors integrated logistic support requirements. Monitors contract negotiations and approves proposed contractual actions required for accomplishment of project and evaluates progress. Coordinates changes to scope, timing and cost with functional organizations. Controls logistic support functions. Approves design changes to support equipment as appropriate.

Related Codes: NOBC - 6472, 6982; DOD Group - 4E Ordnance

6472 WEAPONS CONTROL SYSTEMS PROJECT OFFICER (SURFACE) [WEPCTL PJSURF]

(For definition, see NOBC 6470)

Related Codes: NOBC - 6470; DOD Group - 4E Ordnance

6482 OPTICAL REPAIR OFFICER [OPTICAL REP]

Administers repair, adjustment and inspection of fire control and navigational optical equipment. Supervises maintenance of equipment. Inspects and approves work completed by optical shop. Participates in arrival conferences and schedules optical instrument repairs for vessels in accordance with approved work requests, priorities and availability of personnel and material. Assigns personnel and renders technical assistance on work in progress.

Related Codes: NOBC - 6704; DOD Group - 4E Ordnance

UNDERSEA WEAPONS GROUP

6500-6599

Classifications in this group identify primary duties associated with torpedoes and mines, including countermeasures.

6503 DEGAUSSING OFFICER [DEGAUSSING]

Directs operations to measure and control, or counteract magnetism of ships. Directs operation of magnetic survey range. Superintends installation, maintenance, repair, alteration and inspection of degaussing equipment. Supervises the measurement of ship's magnetic fields, preparation of calibration charts, and degaussing, deperming, flashing, or wiping operations. Instructs personnel in degaussing equipment repair procedures. Establishes procedures for inspections of equipment. Oversees maintenance of degaussing facilities.

Related Codes: NOBC - 7930; DOD Group - 4B Electrical/Electronic

6516 MINE ASSEMBLY AND REPAIR OFFICER [MINE ASEM&REP]

Supervises assembly, testing, reworking, repair and alteration of mines, mine components and mine assemblies. Prepares job directives, procedures, job orders and test schedules. Procures material needed. Controls issue of all expendable material. Ensures compliance with safety precautions. Schedules repairs in accordance with approved work requests, priorities and availability of personnel and facilities. Provides technical assistance on overhaul and testing. Supervises reworking and modification of mine material. Conducts periodic surveillance of different types of mines.

Related Codes: NOBC - NONE; DOD Group - 4E Ordnance

6537 TORPEDO WEAPONS OFFICER [TORP WEP]

Directs, plans, or supervises manufacture, assembly, overhaul, repair, testing, ranging, storage, handling and inspection of torpedoes and depth charges. Plans program for manufacture and assembly. Supervises repair and alterations. Schedules torpedo and depth charge repairs in accordance with approved work requests, priorities and availability of personnel and material. Provides technical assistance on overhaul and testing. Directs operation of torpedo range and collection of test data. Ensures proper storage and handling of explosive components.

Related Codes: NOBC - 6558; DOD Group - 4E Ordnance

6558 TORPEDO TEST OFFICER [TORP TEST]

Conducts or directs tests of torpedo performance. Ranges or proof-tests torpedoes. Studies and makes analysis of performance and prepares analytical reports. Accepts or rejects torpedoes ranged. Supervises diagnostic examinations of faulty torpedoes to discover reasons for failure, making recommendations for corrections. Supervises torpedo overhaul at testing range.

Related Codes: NOBC - 6537; DOD Group - 4E Ordnance

6582 UNDERSEA WEAPONS PROJECT OFFICER [USEA WEPPI]

Administers underwater project within defined boundaries of time, resources, and performance requirements. Prepares master plan, including schedules, costs and scope of all work and resources required. Initiates overall plans for production of end products, systems, and subsystems. Monitors integrated logistic support requirements. Monitors contract negotiations and approves proposed contractual actions required for accomplishment of project and evaluates progress. Coordinates changes to scope, timing and cost with functional organizations. Controls logistic support functions. Approves design changes to support equipment as appropriate.

Related Codes: NOBC - 2175; DOD Group - 4E Ordnance

WEAPONS MATERIAL AND PROGRAMS GROUP

6700-6799

Classifications in this group identify primary duties associated with design, development, acceptance, procurement, installation, distribution, maintenance, and overhaul of weapons material.

6702 WEAPONS DISTRIBUTION OFFICER [WEP DIST]

Controls supply and issue of naval weapons. Maintains records of past usage data and estimates of future replacement needs. Controls allocation and accounting methods and procedures, reviewing allowances with respect to availability and utilization of materials in order to maintain adequate stock levels. Schedules distribution of material on basis of operational requirements, stock availability, lead time required for procurement, availability of funds and production facilities. Expedites delivery of urgently needed material. Prepares budget estimates.

Related Codes: NOBC - 6708, 6715, 6999; DOD Group - 8B Supply

6704 WEAPONS MAINTENANCE OFFICER [WEP MNT]

Administers program for maintenance of weapons. Provides technical direction to operational command and naval or private manufacturing plant concerning overhaul, reworking, or alteration of weapons. Advises on and maintains maintenance engineering policies and practices. Initiates and revises pertinent publications. Prepares budget estimates.

Related Codes: NOBC - 6940, 6978; DOD Group - 4E Ordnance

6708 WEAPONS PROCUREMENT OFFICER [WEP PROC]

Initiates and administers naval weapons procurement program. Plans production and assembly schedules. Initiates and issues project orders to government plants. Provides technical engineering information to contract negotiators. Approves revisions of drawings and specifications. Reviews production schedule. Evaluates and coordinates suggestions from operational commands and private manufacturing concerns. Prepares budget estimates.

Related Codes: NOBC - 2170, 6715, 6914, 6968; DOD Group - 8D Procurement and Production

6715 WEAPONS MATERIAL OFFICER (GENERAL) [WEP MTL GEN]

Directs or administers program for procurement, installation, distribution, maintenance and overhaul of various types of weapons material. Establishes production and maintenance engineering policies and preservation and storage methods. Directs overhaul and distribution of material. Assists in formulating mobilization plans, maintaining current war plans and implementing directives. Prepares budget estimates and administers funds.

Related Codes: NOBC - 2170, 6702, 6704, 6708; DOD Group - 4E Ordnance

6716 WEAPONS MATERIAL OFFICER (NUCLEAR) [WEP MTL NUC]

(For definition, see NOBC 6715)

Related Codes: NOBC - 9080, 9289; DOD Group - 4E Ordnance

6717 PROGRAM MANAGER, WEAPONS SYSTEMS [PGM MGR WEPSYS]

Administers weapons systems design, development, acceptance and utilization programs. Coordinates and directs program planning functions. Fosters cooperative action in meeting overall command goals and objectives. Coordinates policies affecting assigned projects and ensures that effective policies are established and implemented. Reviews and approves detailed plans prepared within systems command for assigned projects and programs. Recommends modifications, as necessary, to requirements received from higher authority.

Related Codes: NOBC - 2145, 2165; DOD Group - 4E Ordnance

GENERAL GROUP (WEAPONS ENGINEERING FIELD)

6900-6999

Classifications in this group identify primary duties associated with overall weapons engineering administration and with weapons engineering duties not specifically identified in another group.

6914 NAVAL PLANT REPRESENTATIVE [NAV PLANT REP]

Administers all types of contracts placed with private contractors and serves as primary government point of contact with the contractor. Maintains surveillance of contractor's management, systems, procedures and methods, and ensures economical operation. Represents contracting agencies and project managers on all contracting matters and ensures compliance with prescribed procurement, engineering and quality procedures and objectives. Advises contracting agencies and project managers on present and predicted contractor cost and schedule performance. Ensures proper plant security and maintenance of government facilities and equipment. As appropriate, maintains surveillance of flight operations.

Related Codes: NOBC - 1485, 6936, 6982; DOD Group - 8D Procurement and Production

6920 WEAPONS DESIGN OFFICER [WEP DESIGN]

Directs or participates in development of productions designs for weapons and weapons handling equipment. Analyzes and interprets inspection and test data to determine need for changes or development of new design. Originates designs, develops prototypes and conducts feasibility tests. Supervises personnel preparing preliminary designs and finished work, drawings and specifications. Reviews for approval drawings, sketches, specifications and process sheets. Recommends standard practices to be used in handling, stowing and shipping.

Related Codes: NOBC - 6717, 6948, 6968; DOD Group - 4E Ordnance

6930 NAVAL WEAPONS TECHNICAL LIAISON OFFICER [NAVWEP TECHLIA]

Coordinates foreign and domestic activities of systems commands, field services and operational units in regard to naval weapons projects. Monitors planning, projects and progress reports. Effects special training in use of new equipment and in improved methods. Aids operational units in various phases of readiness. Advises systems commands of needs of field services and operational units. Acts as clearinghouse for questions regarding plans and policies. Recommends adjustment of fiscal allocations.

Related Codes: NOBC - 6948, 6999; DOD Group - 4E Ordnance

6936 WEAPONS SYSTEMS INSPECTION AND SURVEY OFFICER [WEP SYS SURV]

Serves as member of engineering board concerned with acceptance of weapons systems for naval use or elimination of individual or type weapons systems from naval list. Directs or participates in conduct of engineering and operational trials and tests of new and experimental weapons systems to determine suitability for naval requirements. Directs or assists in preparation of technical reports covering board's findings and recommendations for acceptance or survey.

Related Codes: NOBC - 6914, 6938, 6960; DOD Group - 4E Ordnance

6938 WEAPONS AND AMMUNITION INSPECTION/SAFETY OFFICER [WEP&AM INS/SAF]

Directs or conducts inspection of inservice weapons, ammunition, installations and handling equipment. Ensures equipment and workmanship conformance to Navy specifications and operating and safety standards. Inspects installed equipment and recommends repairs or alterations as necessary. Advises supervisors of potential dangers and recommends changes to safety regulations.

Related Codes: NOBC - 6083, 6914, 6936, 6940; DOD Group - 4E Ordnance

6940 WEAPONS INSTALLATION AND REPAIR SUPERINTENDENT [WEP INSTL&REP]

Superintends or assists in installation, alteration, or repair of weapons equipment aboard ships during outfitting or overhaul. Assigns inspectors or inspects ship's armament to evaluate work required, yard shops involved, and ship's availability and location. Assists ship and yard commands in carrying out established repair schedules. Supervises shipboard repairs, alterations and installations. Tests and inspects repaired equipment to ensure satisfactory performance.

Related Codes: NOBC - 6968, 6978, 7999; DOD Group - 4E Ordnance

6942 WEAPONS LOGISTICS OFFICER [WEP LOG]

Directs or conducts technical planning for weapons aspects of logistics plans and programs for support of naval operating forces. Advises overall logistic planners concerning type and number of weapons personnel, materials and facilities necessary for operation and strategic plans. Determines readiness of equipment in store to fulfill requirements of mobilization plans. Coordinates assembly and checks progress of shipments of advanced base assemblies. Directs maintenance, preservation, storage and inventory control of advanced base weapons materials.

Related Codes: NOBC - 6940, 6948; DOD Group - 8A Logistics, General

6948 WEAPONS MILITARY CHARACTERISTICS OFFICER [WEP MIL CHAR]

Controls overall Navy program for design and development of all types of weapons equipment, establishing military characteristics needed to meet naval operating requirements and coordinating development programs assigned to various systems commands or offices. Interprets operational reports to obtain information on current equipment and requirements for new equipment to meet tactical needs. Establishes physical and performance characteristics of equipment. Initiates directives to weapons activities for development or production of such equipment. Coordinates projects.

Related Codes: NOBC - 6920, 6980; DOD Group - 4E Ordnance

6960 WEAPONS OFFICER, NAVAL ACTIVITY [WEP NAV ACTY]

Directs weapons program within naval activity such as training center or naval base. Directs maintenance and inspection of magazines, material and equipment. Oversees procurement and disposition of weapons equipment. Devises and enforces safety precautions. Prepares reports and maintains records.

Related Codes: NOBC - 6083, 6968, 9252, 9258; DOD Group - 4E Ordnance

6962 WEAPONS PLANNING AND PROGRESS OFFICER [WEP PLN&PROG]

Formulates basic plans for Naval Sea Systems Command or related shore activities and reviews progress in implementation thereof. Interprets broad naval weapons operational and material plans in order to develop systems command or activity planning programs. Advises divisions and activities of indicated plan requirements, ensuring revisions to conform to changing overall plans. Analyzes periodic reports from divisions and activities to ascertain progress and to ensure coordination of program. Prepares special studies and reports as required.

Related Codes: NOBC - 6715, 6942, 6980; DOD Group - 4E Ordnance

6966 WEAPONS PLANS AND POLICIES DIRECTOR [WEP P&P DIR]

Exercises policy direction and control over particular phases of weapons engineering. Controls and directs particular phases such as research and development, quality control, and weapons material functions and assists, as assistant director or special assistant, in such direction and control. Coordinates weapons activities within major field establishment such as shipyard or proving grounds.

Related Codes: NOBC - 6942, 6948, 6980; DOD Group - 4E Ordnance

6968 WEAPONS AND AMMUNITION PRODUCTION OFFICER [WEP&AMMO PROD]

Plans and superintends production of weapons and ammunition. Directs flow of work. Analyzes new designs to determine interchangeability of parts, feasibility and economy of manufacture. Establishes manufacturing procedures for production of experimental equipment. Oversees design, production and procurement of weapons and ammunition.

Maintains quality control and inspection of work in shops. Directs development of facilities to ensure economical and efficient manufacturing. Ensures continuing contact with new or improved manufacturing methods.

Related Codes: NOBC - 6914, 6938, 6940, 6978; DOD Group - 4E Ordnance

6974 WEAPONS TECHNICAL INFORMATION OFFICER [WEP TECH INFO]

Manages program for procurement, dissemination, and publication of weapons technical information. Establishes and maintains procedures for receiving and recording technical reports, information and drawings. Prepares technical publications providing information on minimum standards of calibration of special weapons, including mechanical, electrical and nuclear components, test equipment, special design equipment and commercial equipment. Reviews and evaluates technical information for pertinence to naval weapons programs. Assigns and controls security classification of technical data.

Related Codes: NOBC - 2690, 6982; DOD Group - 4E Ordnance

6978 WEAPONS REPAIR OFFICER [WEP REP]

Plans and directs installation, repairs and alterations to shipboard weapons and associated equipment. Supervises maintenance of equipment and oversees repair of weapons and weapons systems such as guns and mounts, torpedoes and fire control systems. Inspects ships' armament to determine work required. Participates in arrival conferences and schedules weapons repairs for vessels. Assigns personnel and renders technical assistance on shop and shipboard repair work in progress. Inspects and approves completed work.

Related Codes: NOBC - 6940, 6968, 7999; DOD Group - 4E Ordnance

6980 WEAPONS RESEARCH PLANNING OFFICER [WEP RSCH PLN]

Directs planning and coordination of weapons research and development program. Prepares budget estimates, directs allocation of funds and maintains necessary records. Ensures that various programs are in accordance with material program. Maintains liaison with other services and government activities. Evaluates, by scientific analysis, present and potential effectiveness of various weapons and weapons systems. Prepares reports.

Related Codes: NOBC - 2145, 6920, 6948, 6982; DOD Group - 5L Research and Development Coordinators

6982 WEAPONS TECHNICAL OFFICER [WEP TECH]

Serves as advisor in basic engineering or scientific fields such as chemistry, physics, mathematics, metallurgy; electrical, electronic, or mechanical engineering; weapons research, design, testing and production activities. Studies current directives, service reports and field suggestions to determine needs in weapons research. Administers special research projects established to develop particular type of weapons. Reviews and analyzes basic engineering or scientific problems arising in the course of weapons research, testing, production and inspection.

Related Codes: NOBC - 2050, 2070, 2090, 5917, 6920; DOD Group - 4E Ordnance

6990 WEAPONS SAFETY OFFICER [WEP SAF]

Establishes techniques and methods to safeguard weapons activities' property and personnel against explosive or industrial accidents. Inspects weapons shore facilities to determine hazards. Advises supervisors of potential dangers, recommending corrective measure. Assists in preparing safety regulations.

Related Codes: NOBC - 2740, 6083, 6960, 8656; DOD Group - 4J Safety

6999 STAFF WEAPONS MATERIAL OFFICER [STF WEP MTL]

Assists staff material officer or commander by administering weapons phase of material and maintenance program for command. Directs material maintenance operation and efficiency of ship equipment under cognizance of Naval Sea Systems Command. Prepares correspondence, operating and maintenance manuals and instructions. Develops and supervises tests and inspections of material and equipment. Consults and advises unit commanding officers and weapons officers on material matters and ammunition logistics. Prepares and administers ordnance repair and alteration budgets.

Related Codes: NOBC - 6942, 6960; DOD Group - 4E Ordnance

NAVAL ENGINEERING FIELD

7000-7999

This field includes classifications which identify billets with primary duties involving planning, research, design, development, construction, production, alteration, repair and upkeep of naval vessels.

MAJOR GROUPS

7100-7199 HULL

7200-7299 MACHINERY

7300-7399 MATERIAL

7400-7499 PRODUCTION ENGINEERING

7900-7999 GENERAL

HULL GROUP

7100-7199

Classifications in this group identify primary duties associated with the planning, development, construction, and maintenance of surface and submarine hulls and their appurtenances.

7120 NAVAL ENGINEERING HULL DEVELOPMENT OFFICER [NAVENG HULLDEV]

Directs or participates in research, design, development and test of hulls, hull structures and appurtenances. Initiates and supervises research and preliminary design work. Evaluates adequacy of damage control design features and recommends improvements. Designs hull stowage and living spaces, ship furniture, and messing and berthing equipment. Applies knowledge of hydromechanics to development of design criteria and power requirements for all naval vessels. Recommends military characteristics for new ships. Oversees major hull alterations and conversions.

Related Codes: NOBC - 7165, 7974; DOD Group - 4G Ship Construction and Maintenance

7140 HULL INSPECTION OFFICER [HULL INSP]

Directs or performs inspections on ship hulls and hull components at naval and private shipyard and repair facilities. Makes preliminary inspections of inservice ships to determine battle damage or recommend routine repairs required. Attends final tests of hull repairs and installation. Establishes inspection standards adhering to Naval Sea Systems Command controlling directives. Assists private contractors by setting up work schedules, enforcing material priorities and expediting clarification of design and production problems. Inspects ships subject to survey on desirability of retention or disposal.

Related Codes: NOBC - 7187, 7927; DOD Group - 4G Ship Construction and Maintenance

7165 HULL SUPERINTENDENT [HULL SUPT]

Directs construction, conversion, alteration, or repair of ship hulls and hull equipment at naval shipyard or repair facility. Establishes technical specifications and procedures to guide production activities and assigns assistants to duties. Participates in arrival conferences, evaluating hull work requested and assisting in estimating work requirements. Coordinates accomplishment of work, assisting in resolving conflicts in work schedules. Directs officer and civilian inspectors in enforcing adherence to basic designs, specifications and standards of workmanship.

Related Codes: NOBC - 7187, 7936, 7937; DOD Group - 4G Ship Construction and Maintenance

7187 STAFF HULL MATERIAL OFFICER [STF HULL MTL]

Assists staff material officer or commander by administering hull phase of material and maintenance program for command. Directs material maintenance, preservation and repair of ships' hulls and appurtenances. Supervises tests and inspection of hulls. Exercises technical supervision over tender, naval shipyard and ship's force repairs; advises unit

commanding officers and first lieutenants. Assists in preparation of ship's repair budgets, determining supply and logistic requirements of hull material maintenance. Coordinates damage control program of command.

Related Codes: NOBC - 7976; DOD Group - 4G Ship Construction and Maintenance

MACHINERY GROUP

7200-7299

Classifications in this group identify primary duties associated with the development, installation, inspection, maintenance, and repair of ship machinery and mechanical equipment, and diving and salvage equipment.

7241 MACHINERY INSTALLATION AND REPAIR SUPERINTENDENT [MACH INST&REP]

Supervises installation, repair and alteration of machinery on naval vessels. Reviews machinery work requests, inspecting machinery at ship arrival conference, and offers technical advice in deciding need for repair and material requirements. Arranges sequence of machinery repair and installation work. Oversees performance of critical repair and installation work, ensuring adherence to prescribed standards. Inspects and approves completed job orders.

Related Codes: NOBC - 7976; DOD Group - 4H Ship Machinery

7245 NAVAL ENGINEERING MACHINERY DEVELOPMENT OFFICER [NAVENG MACHDEV]

Establishes, administers, directs and evaluates research, design, development and testing programs for ship machinery. Furnishes design and test engineering services for propulsion and heat exchange equipment, including main engines, turbines, bearings, reduction gears, shafting, propellers, auxiliaries, boilers, condensers, distilling plants, pumps, blowers, refrigerating plants and air conditioning systems. Develops material procurement specifications. Directs noise and vibration reduction projects. Provides technical advice as requested. Ensures arrangement of ship machinery components, systems and connections into integrated engineering plant.

Related Codes: NOBC - 7241, 7959; DOD Group - 4H Ship Machinery

7249 NUCLEAR SYSTEMS AND COMPONENTS REPAIR OFFICER, SHIP [NUC SYS&CMPREP]

Administers repairs to nuclear reactor machinery, components and associated auxiliary equipment. Supervises maintenance of equipment and work of shops. Participates in arrival conferences and schedules installations and repair to nuclear reactor machinery for vessels in accordance with regulations. Confers with other repair shops in deciding sequence of tasks. Reviews designs, specifications and job orders for specific installations and repairs to ensure conformance with directives. Directs removal of obsolete or damaged equipment and installation of replacements.

Related Codes: NOBC - 7968, 9392-9394; DOD Group - 4H Ship Machinery

7251 RADIOLOGICAL CONTROL OFFICER [RADIOLOG CTL]

Plans and directs control of radioactive materials, radiation and radioactive contamination associated with servicing nuclear propulsion plants. Plans and directs application of radiological controls required during servicing of nuclear propulsion plants. Reviews work orders and procedures to ensure adequate provisions for radiation and radioactive contamination control. Trains personnel in required controls. Ensures adequate accountability for radioactive material. Maintains and distributes pertinent tender manuals and instructions. Directs radiological operations in, or associated with, nuclear support facilities.

Related Codes: NOBC - 7968, 9392-9394; DOD Group - 4J Safety

7273 NUCLEAR POWER RESEARCH PROJECT OFFICER [NUC PWR RSCHPJ]

Conducts and administers research, development and design projects of nuclear powerplants. Evaluates results of work by contractors and shipbuilders. Provides for exchange of information among all groups working on a project, including design criteria, specifications, operating data, space and weight considerations and other matters relating to a complete nuclear powerplant design. Represents Navy on interservice boards and committees dealing with nuclear power.

Related Codes: NOBC - 4710, 7968; DOD Group - 4N Engineering and Maintenance - Other

7285 STAFF MACHINERY MATERIAL OFFICER [STF MACH MTL]

Assists staff material officer or commander by administering ship machinery phase of material and maintenance program for command. Directs material maintenance of ship machinery under cognizance of Naval Sea Systems Command. Exercises technical supervision over tender, naval shipyard and ship's force repairs required by ships of command.

Supervises material tests and inspections of ship machinery. Advises unit engineering officers on material and maintenance matters, supply of materials and maintenance of stock and spare parts.

Related Codes: NOBC - 9362-9370, 9390; DOD Group - 4H Ship Machinery

MATERIAL GROUP

7300-7399

Classifications in this group identify primary duties associated with the procurement of shipbuilding materials, and the development of specifications for fuels and lubricants for military needs.

7358 FUELS AND LUBRICANTS TECHNICAL OFFICER [FUEL&LUB TECH]

Develops specifications for fuels and lubricants for military needs, developing and directing test and inspection programs and maintaining liaison with industry and other military agencies on technical matters. Provides technical advice and assistance to supply and logistics agencies, systems commands and offices and industry.

Related Codes: NOBC - 4240; DOD Group - 4N Engineering and Maintenance Officers - Other

PRODUCTION ENGINEERING GROUP

7400-7499

Classifications in this group identify primary duties associated with organizing and administering navy yard production shops or planning utilization of production facilities and improvement of production processes.

7420 SHIP TYPE PLANNING AND ESTIMATING SUPERINTENDENT [SHP TYP P&E]

Directs the planning for and calculation of the cost of the alteration, repair, overhaul and new construction of ship hull structures and machinery. Examines repair requests, determining work to be accomplished. Initiates preparation of designs and job orders. Makes final estimates and plans for ship arrival conferences. Inspects ship hull and machinery. Schedules time and sequence of repairs, reporting on work progress.

Related Codes: NOBC - 7970; DOD Group - 4G Ship Construction and Maintenance

7435 QUALITY ASSURANCE SUPERINTENDENT [QA SUPT]

Directs planning, execution and monitoring of overall quality assurance program. Maintains standards by directing performance of such quality assurance functions as inspections and physical, chemical, qualification and nondestructive tests.

Develops training program. Develops and implements policies for assuring conformance to technical requirements. Executes assigned research and development.

Related Codes: NOBC - 1485; DOD Group - 4N Engineering and Maintenance Officers - Other

7445 PRODUCTION ENGINEERING OFFICER [PROD ENG]

Administers Production Engineering Division. Develops performance standards and supervises development of improved production processes and engineered methods including shop layout studies. Supervises development and distribution of work schedules. Develops standard schedules for repeat-type work items and alterations. Aids shops in resolving scheduling conflicts. Analyzes workload and manpower requirements to maintain proper balance. Supervises maintenance of records. Assists production officer in all aspects of production planning and control. Directs tool program. Participates in shipyard industrial facilities program.

Related Codes: NOBC - 7997; DOD Group - 8D Procurement and Production

7450 SHOP PRODUCTION OFFICER [SHOP PROD]

Plans, organizes and controls industrial shop production. Regulates shopwork according to manpower, facilities and materials available. Controls production by establishing schedules and maintaining production charts and other indexes. Balances fluctuations in workload by redistributing work and workmen among shops, or recommending purchase of materials instead of their manufacture in yard shop. Directs and conducts studies of current shop methods and related problems. Compares operating costs of different shops to discover disproportionate outlays.

Related Codes: NOBC - 7997; DOD Group - 8D Procurement and Production

GENERAL GROUP (NAVAL ENGINEERING FIELD)

7900-7999

Classifications in this group identify primary duties associated with overall research, planning, design, and production in the construction and repair of ships and ships' equipment, and with naval engineering duties not specifically identified in another group.

7901 SHIP ACTIVATION/INACTIVATION OFFICER [SHPACT/INACT]

Supervises and directs teams in activation or inactivation of ships. Provides for making habitable all living and berthing spaces. Provides for nucleus and balance crews in ship activation and ship operations sufficient to permit sea trials. Provides for loading of equipage, consumables, spare parts and ammunition. Supervises inactivation of ships and preservation and stowage of related equipment. Plans and directs research in methods of preservation.

Related Codes: NOBC - 7976; DOD Group - 4G Ship Construction and Maintenance

7905 SHIP PROJECT OFFICER [SHP PJ OFF]

Functions as central SUPSHIP point of contact for assigned ship project. Provides overall coordination for: engineering/technical design services, quality assurance and inspection, ship trials and delivery, progress monitoring/scheduling, material procurement, fitting out and post-shakedown availabilities, configuration control, claims monitoring, funds control, contract change negotiation and adjudication, guarantee provisions and final settlement, liaison with PCO/CO, TYCOM, NAVSEA, INSURV and other commands.

Related Codes: NOBC - 7910, 7927, 7984, 7996; DOD Group - 4G Ship Construction and Maintenance

7910 ENGINEERING LIAISON OFFICER [ENG LIAISON]

Maintains liaison between head of naval mission, attache, maritime or space agencies, etc., and headquarters command regarding ship construction, conversion and repair and design and installation of systems and equipment. Maintains cognizance of problem area and status of projects. Provides technical engineering advice. Assists on problems of completion, acceptance and operation of vessels. Arranges for performance of work and establishes financial basis for agreement.

Related Codes: NOBC - 7927, 7966, 7984; DOD Group - 4G Ship Construction and Maintenance

7927 NAVAL ENGINEERING INSPECTION OFFICER [NAV ENG INSP]

Conducts or directs inspection of hulls, machinery and electrical equipment during fabrication and installation. Establishes standards, frequency and method of inspection. Examines work for conformance to specifications and standards, approving minor alterations in plans made necessary by production or installation difficulties and recommending corrective action where material is deficient. Witnesses tests of material and equipment for verification purposes. Appraises capacity of private plants to perform required contracts.

Related Codes: NOBC - 7140; DOD Group - 4G Ship Construction and Maintenance

7930 SHIP ELECTRICAL REPAIR OFFICER [SHP ELC REP]

Directs ship electrical repair activities. Trains and directs assistants for electrical repairs of ships. Attends arrival conferences. Ensures execution of repairs by supervision and inspection, correlating shipboard electrical work with that of hull, machinery and weapons, deciding sequence of shop and shipboard tasks. Oversees installation of electrical units. Inspects and approves completed job orders. Authorizes, and reports to repair agent, minor variations from designs.

Related Codes: NOBC - 9353; DOD Group - 4B Electrical/Electronic

7931 NAVAL ENGINEERING LOGISTICS OFFICER [NAV ENG LOG]

Develops or directs technical planning for ship construction, maintenance and repair in support of operational, strategic, or logistical planning. Reviews operational planning requirements, analyzing engineering and material problems represented. Supervises preparation of technical plans. Recommends distribution methods to ensure availability of materials for planned requirements such as new construction, alteration and repair. Estimates logistic implications of technological developments, new ship types and equipment. Furnishes technical advice and assistance to command or logistical planning officers.

Related Codes: NOBC - 9051; DOD Group - 8A Logistics, General

7936 SHIP CONSTRUCTION AND REPAIR SUPERINTENDENT (GENERAL) [SHP C&R GEN]

Directs division of naval shipyard production department concerned with shopwork and ship construction and/or repair, alteration, conversion, or overhaul. Coordinates specialized units concerned with hull, machinery, weapons, electrical and electronic equipment, or nuclear reactor plant. Supervises superintendents having immediate responsibility for specific projects. Determines priority of work within division. Secures approval for minor modifications in designs for repairs, recommending major alterations to planning department. Expedites work to comply with established schedules. Coordinates work with other yard divisions.

Related Codes: NOBC - 7976, 7996; DOD Group - 4G Ship Construction and Maintenance

7937 SHIP CONSTRUCTION AND REPAIR SUPERINTENDENT (SURFACE SHIPS) [SHP C&R SURF]

(For definition, see NOBC 7936)

Related Codes: NOBC - 7976, 7996; DOD Group - 4G Ship Construction and Maintenance

7938 SHIP CONSTRUCTION AND REPAIR SUPERINTENDENT (SUBMARINES) [SHP C&R SUB]

(For definition, see NOBC 7936)

Related Codes: NOBC - 7976; DOD Group - 4G Ship Construction and Maintenance

7939 SHIP CONSTRUCTION AND REPAIR SUPERINTENDENT (NUCLEAR) [SHP C&R NUC]

(For definition, see NOBC 7936)

Related Codes: NOBC - 7976, 7996; DOD Group - 4G Ship Construction and Maintenance

7959 NAVAL ENGINEERING RESEARCH PROJECT OFFICER [NAVENG RSCH PJ]

Administers scientific research in naval engineering problems. Maintains liaison with civilian contractors or sections of naval research laboratory. Evaluates progress of research contract. Suggests solutions to problems involving future or proposed course of project. Advises scientific personnel on suitability of developmental work for Navy use. Represents project in committee meetings and contacts with other organizational units. Studies results of research, establishing new naval applications. Arranges for conduct of tests and experiments and field expeditions.

Related Codes: NOBC - 7245, 7974; DOD Group - 5L Research and Development Coordinators

7966 NAVAL ENGINEERING TRIALS AND SURVEY OFFICER [ENG TRI&SURV]

Directs acceptance trials and surveys of naval vessels. Supervises hull, machinery, electrical and weapons engineering officers in making specialized inspection. Conducts acceptance trials, scheduling sequence of events and ensuring that adequate crew is aboard to operate equipment. Reports on deficiencies, fixing responsibility and advising acceptance or rejection. Inspects ships subject to survey, advising on desirability of retention or disposal. Outlines disposition procedure for survey ships.

Related Codes: NOBC - 7140, 7927; DOD Group - 4G Ship Construction and Maintenance

7968 NUCLEAR POWER SUPERINTENDENT [NUC PWR SUPT]

Controls and coordinates engineering and planning of nuclear propulsion plant work. Directs programs of reactor safety, construction, overhaul, maintenance, modification, testing and refueling. Inspects all work on reactor plants, ensuring technical and quality control. Prepares specifications and requirements for special tools, equipment, facilities, training, procurement and inspection of materials. Renders technical advice on facilities, procedures, schedules, estimates, methods, responsibilities, training, safety and security. Ensures proper nuclear support facilities on submarine tenders. Administers Nuclear Power Division.

Related Codes: NOBC - 7249, 7273; DOD Group - 4N Engineering and Maintenance - Other

7970 YARD PLANNING OFFICER [YARD PLN]

Administers shipyard planning department, including direction of activities of the planning and estimating division, the design division and the combat systems division. Serves as central authority for committing the shipyard. Authorizes work accomplishment. Supervises cost estimating and control. Directs preparation and issue of technical specifications and designs. Initiates procurement of material and funds. Administers funds for industrial work.

Related Codes: NOBC - 7420, 7974, 7998; DOD Group - 4G Ship Construction and Maintenance

7974 NAVAL ENGINEERING OFFICER, SHIP DESIGN [NAVENG SHPDSGN]

Directs or supervises ship design activities. Organizes and coordinates design work, including value engineering studies. Serves as consultant on hull, machinery, electrical and electronic design problems for ships under construction, overhaul, conversion, inactivation, and for special design projects. Directs stability and strength tests. Supervises ship design improvement projects and approves designs on basis of adequacy and accuracy.

Related Codes: NOBC - 7120, 7245; DOD Group - 4G Ship Construction and Maintenance

7976 SHIP REPAIR OFFICER [SHP REP]

Directs hull, machinery, electrical and electronic repair work on all types of naval vessels. Examines work requests from ships alongside. Confers with repair department officers and with executive and engineering officers of ships, deciding feasibility of performing requested repairs. Supplies technical advice, interpreting Naval Sea Systems Command policy to conferees. Directs distribution of authorized work among repair divisions, establishing priorities in accordance with needs of vessel and capacity of yard or tender.

Related Codes: NOBC - 7165, 7241, 7930, 7936-7939; DOD Group - 4G Ship Construction and Maintenance

7984 SHIP TYPE ENGINEERING OFFICER [SHP TYP ENG]

Directs engineering activities such as systems command or fleet staff activities organized on basis of ship types. Reviews and authorizes plans for new construction, repair and alteration of type vessel. Assigns design and development work to various specialized engineering divisions. Coordinates activities of systems command, shipyards and private contractors during new construction and conversion. Reviews type inspection, trial board and similar reports and corrects deficiencies. Authorizes expenditure of funds for type ship.

Related Codes: NOBC - 7974; DOD Group - 4G Ship Construction and Maintenance

7996 SUPERVISOR OF SHIPBUILDING, CONVERSION, AND REPAIR [SUP SHP]

Administers Navy and other Department of Defense shipbuilding, design, conversion, repair and facility contracts with private shipbuilding plants. Ensures compliance with contract terms, schedules, specifications and quality assurance requirements. Approves requests for repair/conversion funds for coordination of fiscal requirements within designated area. Directs functions related to repairs, alterations and conversions. Performs mobilization planning for accomplishment of repair and conversion of vessels in designated area.

Related Codes: NOBC - 7927, 7974, 7984, 7997; DOD Group - 8D Procurement and Production

7997 YARD PRODUCTION OFFICER [YARD PROD]

Directs production department of naval shipyard comprising such divisions as shipbuilding, ship repair, and shop. Develops and enforces policies and procedures within department to accomplish work within time allowed and funds allocated. Ensures conformance to applicable instructions and sound engineering and safety practices. Determines work commitments for department. Directs maintenance and custody of materials and equipment. Controls physical security of production shops and of ships prior to commissioning. Coordinates work with other yard departments.

Related Codes: NOBC - 7420, 7445, 7996; DOD Group - 4G Ship Construction and Maintenance

7998 COMBAT SYSTEMS SUPERINTENDENT [CMBT SYS SUPT]

Administers the installation, modification, overhaul and repair of ship combat systems. Provides technical guidance, advice and assistance to shipyard and ships in the introduction of new equipment, systems and shipboard aeronautical material and equipment. Assures proper installation, modification, overhaul, or repair of shipboard electronics, missile and weapons systems and components. Coordinates production and supply activities. Conducts final testing and inspection of operating systems to ensure operability of ship combat systems.

Related Codes: NOBC - 6717; DOD Group - 4G Ship Construction and Maintenance

7999 TECHNICAL ASSISTANT FOR WEAPONS [TECH ASST WEP]

Conducts and carries out evaluation, installation, testing and maintenance programs of shipboard weapons (including fleet ballistic missile) systems, subsystems and component equipment. Supervises shipboard weapons systems installation, testing, maintenance, repair and overhaul. Reviews testing and firing results. Provides advice and guidance on facility and training requirements.

Related Codes: NOBC - 6704; DOD Group - 4E Ordnance

AVIATION FIELD

8000-8999

AVIATION ENGINEERING (DESIGN AND ACCEPTANCE) GROUP

8000-8099

Classifications in this group identify primary duties involving planning, participation in, or direction of research, development, design, and testing of naval aircraft and components.

8002 AERODYNAMICS ENGINEERING OFFICER [AERO ENG]

Plans and directs aerodynamic and hydrodynamic projects concerned with analysis of flight performance characteristics of aircraft and guided missiles. Prepares aircraft specifications concerned with flying qualities of experimental aircraft and guided missiles. Initiates and coordinates aerodynamic tests of aircraft models and components. Evaluates test results determining stability and control characteristics of type aircraft or missile. Suggests modifications in structural design to improve flight performance. Recommends acceptance of model on basis of flight performance.

Related Codes: NOBC - 8026, 8076; DOD Group - 4D Aviation Maintenance and Allied

8004 AERONAUTICAL ENGINEERING OFFICER, AIRCRAFT MECHANICAL, ELECTRONIC, ELECTRICAL, AND SAFETY EQUIPMENT [AEROENG A/CSYS]

Administers and directs research, development and testing of aircraft mechanical, electronic, electrical and/or safety equipment and related systems. Determines design requirements for aircraft equipment such as actuating and flight control systems, airframe components, emergency ejection devices, mechanical standards parts and/or aircrew protective systems and equipment. Prepares production specifications for contractor. Consults with aircraft design engineers in adapting equipment to aircraft. Determines standards for flight testing of equipment and systems.

Related Codes: NOBC - 8026, 8076; DOD Group - 4D Aviation Maintenance and Allied

8015 AIRCRAFT ARMAMENT DEVELOPMENT OFFICER [A/C ARM DVLP]

Plans and directs research, design, development, test, evaluation, or installation programs for aircraft armament. Determines physical and performance characteristics of aircraft weapons including aircraft guns, rockets, pyrotechnics, bombs and bomb systems and chemical systems. Evaluates aircraft and armament compatibility. Manages technical aspects of aircraft armament programs concerned with launching and suspension equipment, pyrotechnic dispensers and launchers, armament monitor and control systems, arming and dearming equipment, guided missile launcher power supplies, armor, turrets and pylons. Supervises preparation of design specifications.

Related Codes: NOBC - 2145, 6920; DOD Group - 4E Ordnance

8018 AIRCRAFT PRODUCTION OFFICER [A/C PROD]

Furnishes technical advice and direction in procurement and production of aircraft and components such as power plants, propellers and instruments. Determines production schedules for aircraft and aircraft components to meet naval aviation requirements. Investigates sources of supplies, bid quotations and manufacturers' capacities and potentials; prepares procurement directives. Directs production and shipment of equipment, ensuring fulfillment of aircraft production schedules. Assists contractors in production engineering, planning and control, maintaining liaison through aviation field representatives.

Related Codes: NOBC - 8076; DOD Group - 4D Aviation Maintenance and Allied

8026 AIRCRAFT TEST ENGINEER [A/C TEST ENG]

Directs or conducts engineering tests on experimental and service-type aircraft to gain data concerning design, fabrication, serviceability and operation of aircraft. Studies details of airframe, powerplant, instrumentation and special equipment of aircraft, determining methods and procedures of conducting tests. Participates in test flights, recording data, observing functioning of aircraft and equipment and supervising operation of aircraft equipment. Prepares technical reports setting forth findings and recommendations.

Related Codes: NOBC - NONE; DOD Group - 4D Aviation Maintenance and Allied

8035 AIRCRAFT/GUIDED MISSILE ENGINE PROJECT OFFICER [AC/GM ENG PJ]

Coordinates aircraft or guided missile engine project within defined boundaries of time, resources and performance requirements. Prepares master plan, including schedules, costs and scope of all work and resources required. Initiates overall production plans. Monitors integrated logistic support requirements. Monitors contract negotiations and approves proposed contractual actions required for accomplishment of project. Evaluates progress. Coordinates changes to scope, timing and cost with functional organizations. Controls logistic support functions. Approves design changes to support equipment, as appropriate.

Related Codes: NOBC - 6280; DOD Group - 4D Aviation Maintenance and Allied

8050 LAUNCHING, RECOVERY, AND LANDING AIDS ENGINEERING OFFICER [LNCH/RECV/AIDS]

Plans, coordinates and directs research, design, development and testing of launching and recovery systems, landing aids and fog modification systems. Develops and implements research plans and programs. Evaluates design proposals. Determines handling equipment needed for new aircraft. Prepares specifications for catapult and arresting gear installations. Prepares technical data and instructions for operation of landing aids.

Related Codes: NOBC - 8004; DOD Group - 4D Aviation Maintenance and Allied

8074 GROUND SUPPORT EQUIPMENT AND SHIP FACILITIES ARRANGEMENT OFFICER [GSE & SFA]

Plans, administers, or executes research and development programs for Ground Support Equipment (GSE) items and determines requirements for, and arrangement of, aviation facilities. Investigates, determines suitability and approves any special, general purpose, standard, or common GSE items used with aircraft and weapons systems. Determines parameters, characteristics, details, coordination of installation requirements and positioning of GSE items aboard ship and at shore activities.

Related Codes: NOBC - 8050; DOD Group - 4D Aviation Maintenance and Allied

8076 TYPE AIRCRAFT DESIGN AND DEVELOPMENT OFFICER [TYP A/C D&D]

Directs Naval Air Systems Command section or project on type of aircraft design, development, test and evaluation of experimental aircraft. Assists in screening and evaluating proposals for type of experimental aircraft. Assists research and development activities concerned with preliminary investigation of proposed project. Recommends award of contract. Oversees project through design and engineering stages, coordinating efforts of systems command division and contractor. Reviews field testing at manufacturer's plant and naval aviation test facilities.

Related Codes: NOBC - 8002; DOD Group - 4D Aviation Maintenance and Allied

AVIATION ENGINEERING (MAINTENANCE AND REWORK) GROUP

8100-8199

Classifications in this group identify primary duties involving planning, administration, and direction of depot, intermediate, and organizational maintenance of naval aircraft, components, parts, and support equipment.

8112 AVIATION MAINTENANCE FIELD REPRESENTATIVE [AV MNT FLD REP]

Visits aircraft activities for purpose of assisting in solution of maintenance problems encountered with naval aircraft. Demonstrates to maintenance personnel proper techniques and use of new or special equipment to improve maintenance. Disseminates technical information. Advises on proper preparation of reports. Assists and advises in obtaining aircraft material, equipment and technical publications. Submits technical reports to Naval Air Systems Command whenever difficulty is encountered which warrants further information, investigation, or action.

Related Codes: NOBC - 8116, 8118; DOD Group - 4D Aviation Maintenance and Allied

8115 AVIATION MAINTENANCE MANAGEMENT ENGINEER [AV MNT MGT ENG]

Develops and coordinates studies to achieve maximum utilization of manpower, material and facilities within the maintenance division. Directs studies for developing uniform production controls, work simplification and work measurement for field programs. Develops uniform organization structures and administrative procedures. Studies uniform means for obtaining, analyzing and utilizing accounting and statistical data. Maintains liaison with management engineering groups of the Navy and other activities to obtain information concerning new developments and techniques.

Related Codes: NOBC - 2160, 8177; DOD Group - 7A Administrators, General

8116 AVIATION MAINTENANCE PLANNING OFFICER [AV MNT PLN]

Directs and supervises planning for establishment of airframe and engine maintenance requirements. Establishes number and type of aircraft to be overhauled. Determines requirements for new spare engines to support approved aircraft program. Directs movement of aircraft from operating commands to overhaul and repair departments or storage pools and return to operating commands. Schedules ferrying of aircraft and maintains progress reports of such movements. Maintains records of location and status of aircraft.

Related Codes: NOBC - 8175, 8176; DOD Group - 4D Aviation Maintenance and Allied

8118 AVIATION MAINTENANCE ENGINEERING OFFICER [AV MNT ENG]

Establishes technical procedures needed to maintain aircraft, aviation equipment and accessories. Investigates and takes corrective action on reports of unsatisfactory material. Recommends changes in design features affecting equipment maintenance. Issues technical bulletins and modification instructions. Determines requirements and reviews for accuracy technical handbooks, including service and parts sections. Selects special tool and test equipment items required for line maintenance and overhaul of aircraft equipment.

Related Codes: NOBC - 8152; DOD Group - 4D Aviation Maintenance and Allied

8125 AVIATION OVERHAUL SCHEDULES OFFICER [AV OVHL SKED]

Schedules overhaul, repair and modification of aircraft, engines and aviation equipment. Distributes aircraft overhaul assignments to various industrial establishments on basis of geographical location, home base of squadron, local labor conditions and transportation facilities. Checks field activities' overhaul schedules for conformance to overall maintenance program and policies. Ensures availability of adequate facilities and personnel to accomplish assigned schedule.

Related Codes: NOBC - 8175, 8176; DOD Group - 4D Aviation Maintenance and Allied

8141 DEPOT MAINTENANCE ENGINEERING AND QUALITY OFFICER [D/MNT ENG/QUAL]

Directs engineering services for Naval Air Rework Facility, ensuring economy of operation and quality of end product. Establishes engineering specifications for processing items in production shops. Interprets and supplements rework specifications supplied by systems command. Prepares and interprets test specifications and limits of performance and calibration for operating, test and standards equipment. Develops and implements quality control procedures and systems. Ensures conformance to quality standards. Furnishes functional guidance and technical services to elements which plan/perform work to design and quality specifications.

Related Codes: NOBC - 8112, 8116, 8118, 8177; DOD Group - 4D Aviation Maintenance and Allied

8152 DEPOT MAINTENANCE PRODUCTION OFFICER [D/MNT PROD]

Administers planning, scheduling and accomplishment of depot maintenance workload. Directs rework operations on designated weapons systems, accessories and equipment. Directs the manufacture of required aircraft parts and assemblies. Ensures effectiveness of production operations. Provides engineering services in support of production operations.

Related Codes: NOBC - 8112, 8125, 8141; DOD Group - 4D Aviation Maintenance and Allied

8175 AIRCRAFT INTERMEDIATE MAINTENANCE/MATERIAL CONTROL OFFICER [A/C IMNT/MTL]

Plans, coordinates and manages aircraft intermediate maintenance workload. Controls activities of production divisions. Monitors workload priorities and assigns completion times for check, test, repair, update/modification, calibration/qualification and overhaul of aircraft engines, airframe systems, avionics systems, aviator's survival systems and general/special aviation maintenance support equipment and associated components. Provides technical assistance to supported activities. Ensures technical compliance with established maintenance policies. Requisitions required material.

Related Codes: NOBC - 8176, 8189, 8925; DOD Group - 4D Aviation Maintenance and Allied

8176 AIRCRAFT ORGANIZATIONAL MAINTENANCE/MATERIAL CONTROL OFFICER [A/C OMNT/MTL]

Plans, coordinates and manages organizational level aircraft maintenance workload. Controls activities of production divisions/branches. Prepares schedules and man-hour estimates for periodic maintenance of aircraft engines, airframes, avionics, weapons, components and support equipment. Assigns job priorities and completion times for unscheduled maintenance actions, technical directive compliance and conditional aircraft inspection requirements ensuring compliance with established maintenance policies. Maintains aircraft, inventory, engine and accessory logs/records and current maintenance index. Maintains liaison with supporting activities. Requisitions required material.

Related Codes: NOBC - 8175, 8190, 8925; DOD Group - 4D Aviation Maintenance and Allied

8177 AIRCRAFT MAINTENANCE QUALITY CONTROL OFFICER [A/C MNT QC]

Administers aircraft maintenance quality control program. Monitors maintenance and repair inspection procedures and standards. Ensures conformance of work accomplished to established standards and safety-of-flight requirements and compliance with calibration and safety instructions. Determines applicability of technical publications and directives to quality control. Identifies discrepancies and takes appropriate action. Performs or directs inspections of maintenance and repair work accomplished, equipment used and ready-for-issue material and spares. Maintains master technical library.

Related Codes: NOBC - 8141; DOD Group - 4D Aviation Maintenance and Allied

8180 AIR WING MAINTENANCE OFFICER [AIR WING MNT]

Coordinates aircraft maintenance performed by and in support of squadrons and units under the cognizance of the Wing Commander. Provides liaison between squadrons, ships and stations in connection with maintenance matters. Manages and operates Wing maintenance control center in Flight Deck Control when embarked.

Related Codes: NOBC - 8189, 8190; DOD Group - 4D Aviation Maintenance and Allied

8189 AIRCRAFT INTERMEDIATE MAINTENANCE OFFICER, GENERAL [A/C IMNT GEN]

Administers and supervises intermediate level maintenance program in accordance with controlling directives from higher authority. Supervises intermediate level maintenance, including calibration, repair or replacement of damaged or unserviceable parts, components, or assemblies and manufacture of unavailable parts. Promotes improvements in policy direction, technical supervision and management control of programs affecting aircraft maintenance activities.

Related Codes: NOBC - 8175, 8177, 8190-8195; DOD Group - 4D Aviation Maintenance and Allied

8190 AIRCRAFT ORGANIZATIONAL MAINTENANCE OFFICER, GENERAL [A/C OMNT GEN]

Administers and supervises organizational level maintenance program in accordance with controlling directives from higher authority. Supervises organization level maintenance, including inspection, servicing, lubricating, adjusting and replacement of parts, minor assemblies and subassemblies. Promotes improvements in policy direction, technical supervision and management control of programs affecting aircraft maintenance activities.

Related Codes: NOBC - 8176, 8196, 8197, 8199; DOD Group - 4D Aviation Maintenance and Allied

8191 AIRCRAFT INTERMEDIATE MAINTENANCE OFFICER, POWERPLANTS [A/C IMNT PWRPL]

Performs intermediate level maintenance functions, as indicated in NOBC 8189, in the area of aircraft powerplants, powerplant components, accessories and related systems including but not limited to engines, propellers, cooling systems, fuel tanks, rotor systems and components.

Related Codes: NOBC - 8189, 8190, 8197; DOD Group - 4D Aviation Maintenance and Allied

8192 AIRCRAFT INTERMEDIATE MAINTENANCE OFFICER, AIRFRAMES [A/C IMNT A/F]

Performs intermediate level maintenance functions, as indicated in NOBC 8189, in the area of air-frame systems and components (except missiles) such as fuselage, wings, fixed surfaces, movable surfaces, cargo hoists, landing gear, hydraulic, pneumatic and utility systems and components.

Related Codes: NOBC - 8002, 8175, 8189, 8197; DOD Group - 4D Aviation Maintenance and Allied

8193 AIRCRAFT INTERMEDIATE MAINTENANCE OFFICER, ARMAMENT EQUIPMENT [A/C IMNT ARMEQ]

Performs intermediate level maintenance functions, as indicated in NOBC 8189, in the area of aircraft weapons systems and components including bombing, gunnery and rocket equipment, sights, bomb racks and launchers, air compressors (armament only), gunfire interrupters and switches, gun cameras, solenoids, switches, transformers, heaters, ammunition containers, bomb release units, door timers, latches, operating mechanisms, warning lights, munitions hoisting and loading equipment, gun charging units, pyrotechnic ejectors and launchers, jet-assisted take-off units and installed tow target equipment.

Related Codes: NOBC - 8189, 8199; DOD Group - 4D Aviation Maintenance and Allied

8195 AIRCRAFT INTERMEDIATE MAINTENANCE OFFICER, SUPPORT EQUIPMENT [A/C IMNT SUPEQ]

Performs intermediate level maintenance functions, as indicated in NOBC 8189, in the area of aircraft maintenance support equipment such as gasoline, electric and diesel powered servicing equipment, gas turbine powered servicing equipment, trailers, dollies and carts (nonpowered) and mechanical support equipment.

Related Codes: NOBC - 8004, 8074, 8189, 8196; DOD Group - 4D Aviation Maintenance and Allied

8196 AIRCRAFT ORGANIZATIONAL MAINTENANCE OFFICER, LINE DIVISION [A/C OMNT LINE]

Performs organizational level maintenance functions, as indicated in NOBC 8190, in the line division. Supervises and assigns plane captains, troubleshooters and ground support equipment maintenance personnel in preoperation, postoperation and daily inspections, servicing and maintenance of assigned aircraft and support equipment.

Related Codes: NOBC - 8176, 8190, 8638; DOD Group - 4D Aviation Maintenance and Allied

8197 AIRCRAFT ORGANIZATIONAL MAINTENANCE OFFICER, AIRCRAFT DIVISION [A/C OMNT A/C]

Performs organizational level maintenance functions, as indicated in NOBC 8190, in the aircraft division. Supervises the inspection, removal, functional test and adjustment and installation of components in such areas as powerplants, airframes and aviator's equipment. Directs the supervision, coordination and completion of periodic maintenance and inspections of assigned aircraft conducted in the maintenance production divisions.

Related Codes: NOBC - 8191, 8192, 8625, 8638; DOD Group - 4D Aviation Maintenance and Allied

8198 AIRCRAFT INTERMEDIATE MAINTENANCE OFFICER, AVIONICS [A/C IMNT AV]

Performs intermediate level maintenance functions, as indicated in NOBC 8189, in the area of aircraft electrical and electronics systems, including radio, radar, navigation, recognition (IFF), aircraft power generation and distribution, lighting and instrumentation, electronic fire control and bombing, sonar, magnetic detection, electronic countermeasures and related systems and avionics support equipment.

Related Codes: NOBC - 5977, 8189, 8199; DOD Group - 4D Aviation Maintenance and Allied

8199 AIRCRAFT ORGANIZATIONAL MAINTENANCE OFFICER, AVIONICS/WEAPONS DIVISION [A/C OMNT AV/WP]

Performs organizational level maintenance functions, as indicated in NOBC 8190, in the Avionics/Weapons Division. Supervises the inspection, removal, functional test and adjustment and installation of components in such areas as electronics, electrical, instrument, weapons, reconnaissance and photographic. Oversees the conduct of periodic maintenance of assigned aircraft in appropriate areas of responsibility.

Related Codes: NOBC - 8190, 8193, 8198; DOD Group - 4D Aviation Maintenance and Allied

FLIGHT GROUP

8500-8599

Classifications in this group identify primary duties involving airborne aircraft operations, including piloting of various types of aircraft, control of airborne aircraft, and operation of airborne equipment.

8501 AVIATOR [AVIATOR]

Pilots or Naval Flight Officers responsible for the safe operation of naval aircraft with regards to command, piloting navigation, communications, or weapons system operation management in support of various missions of the Navy.

Related Codes: NOBC - 8506, 8543, 8583, 8585, 8588, 8591, 8592, 8593, 8594; DOD Group - 2B Other Fixed-Wing Pilots

8506 CARRIER AIRBORNE COMBAT INFORMATION CENTER OFFICER [CV A/B CIC]

Controls and directs Combat Information Center (CIC) operations in carrier-based aircraft configured for CIC. Operates or directs operation of installed equipment including communications and radar. Controls detection, identification and surface and air target tracking operations. Conducts air-intercept control and antisubmarine air-control operations. Coordinates air/surface evolutions. Assists in search and rescue operations.

Related Codes: 8501; DOD Group - 2D Aircraft Crews

8543 INSTRUMENT FLIGHT INSTRUCTOR-PILOT [INSTU FLGTINST]

Instructs student officers and aviation cadets in instrument flying of single-engine and multi-engine aircraft. Explains operation and use of flight and navigational instruments during instrument flight. Illustrates correct instrument flight techniques for use under civil or military air traffic control procedures. Evaluates student flight performance and certifies student as qualified instrument pilot upon successful completion of training.

Related Codes: NOBC - 8501, 8592, 8593; DOD Group - 2B Other Fixed-Wing Pilots

8583 SPECIAL PROJECT PILOT [SP PJ PILOT]

Pilots aircraft or spacecraft for developmental and experimental purposes. Participates in special projects such as guided missile, ordnance, electronic and space exploration projects.

Related Codes: NOBC - 8501, 8588; DOD Group - 2B Other Fixed-Wing Pilots

8585 SPECIAL PROJECT AIRBORNE ELECTRONICS EVALUATOR [SP PJ ELX EVAL]

Directs or participates in electronics or electronic countermeasures projects at naval air development, experimental, test, or fleet activities. Conducts tests in flight in aircraft configured for experimental and/or classified projects such as guided missiles. Operates equipment when required. Supervises and/or instructs watchstanders during flight operations, evaluates results and prepares reports.

Related Codes: 8501; DOD Group - 2D Aircraft Crews

8588 TEST PILOT [TEST PILOT]

Pilots newly constructed, modified, or repaired aircraft on test flights. Examines requirements and restrictions for particular aircraft type to be tested. Operates aircraft under varying flight conditions. Evaluates test aircraft airworthiness. Consults with engineering and maintenance personnel and prepares recommendations concerning equipment and performance discrepancies. Approves aircraft as safe for normal flight.

Related Codes: NOBC - 8501, 8585; DOD Group - 2B Other Fixed-Wing Pilots

8591 NAVAL FLIGHT OFFICER INSTRUCTOR, TRAINING PLANES [NFOINST TRAPLN]

Instructs Naval Flight Officers in navigation principles, celestial and high-speed low-level navigation, electronics and air-to-air intercept procedures. Conducts instruction in classroom, in simulators and in training planes. Demonstrates approved procedures and techniques. Corrects mistakes. Qualifies student in phase when classroom, simulator and in-flight proficiency is demonstrated.

Related Codes: 8501; DoD Group - 2D Aircraft Crews

8592 FLIGHT INSTRUCTOR, TRAINING PLANES [FLGTINST V/HT]

Pilots various type training planes to instruct student officers and aviation cadets in operation of naval aircraft. Explains operation of flight controls and interpretation of flight instrument panel in cockpit. Takes off, operates and lands trainer-type aircraft, demonstrating to student pilot correct techniques and procedures for contact flight. Flies with student at controls and corrects mistakes. Qualifies student for particular type training plane when flight proficiency is demonstrated.

Related Codes: NOBC - 8501, 8543, 8593; DoD Group - 2B Other Fixed-Wing Pilots

8593 FLIGHT INSTRUCTOR - PILOT, FLEET OPERATIONAL AIRCRAFT [FLGTINST PILOT]

Pilots various fleet-type aircraft for purpose of instructing designated naval aviators/naval flight officers (NFOs) transitioning to fleet-type aircraft. Conducts preflight and postflight briefings. Operates fleet-type aircraft from land base or aircraft carrier, demonstrating proper techniques. Conducts ground training, training in tactics and training in operation of navigation, electronic and armament equipment. Certifies pilots/NFOs as qualified for particular aircraft.

Related Codes: NOBC - 8501, 8592; DoD Group - 2B Other Fixed-Wing Pilots

8594 FLIGHT INSTRUCTOR - NFO, FLEET OPERATIONAL AIRCRAFT [FLGTINST NFO]

Instructs designated naval aviators/naval flight officers (NFOs) transitioning to fleet multiplace aircraft. Conducts preflight and postflight briefings. Operates air intercept radar and other electronic search and/or detection devices and associated fire control equipment, demonstrating proper techniques. Conducts ground training, training in tactics and training in operation of navigation, electronic and armament equipment. Certifies pilots/NFOs as qualified for particular aircraft.

Related Codes: NOBC - 8501, 8591; DoD Group - 2D Aircraft Crews

GROUND OPERATIONS GROUP

8600-8699

Classifications in this group identify primary duties involving the direction or administration of operations required for the immediate support of the flight group such as air traffic control, flight safety, line servicing, aircraft arming and fueling, flight scheduling, and miscellaneous airport services.

8606 ANTISUBMARINE CLASSIFICATION AND ANALYSIS OFFICER, AVIATION [ASCLAS&ANAL AV]

Directs evaluation, classification and analysis of antisubmarine operations data. Recommends appropriate tactical action to operational commander. Evaluates performance of assigned aircraft squadrons and recommends improvements to increase capability to develop contacts. Conducts aircrew briefings and debriefings on antisubmarine operations. Maintains status boards on squadron readiness. Evaluates equipment and procedures and as appropriate, recommends improvements.

Related Codes: NOBC - 9040; DOD Group - 2G Operations Staff

8608 AIR BOATSWAIN [AIR BOSN]

Supervises repair group in emergency handling of aircraft during general quarters and flight quarters. Supervises repair unit performing salvage operations, plane recovery, pilot rescue, plane jettisoning and firefighting. Directs emergency repairs to aircraft, firefighting, and plane-handling equipment. Trains personnel in crash and firefighting duties. Conducts inspections to ascertain readiness and ensure servicing and cleaning after use.

Related Codes: NOBC - 8625; DOD Group - 2G Operations Staff

8614 CATAPULT AND ARRESTING GEAR OFFICER [CAT&AG]

Directs and supervises launching and recovery of embarked aircraft. Ensures readiness of launching equipment. Establishes WOD (wind over deck) requirements. Supervises catapult airplane spotter and catapult crew at prescribed launching stations. Directs firing of catapult. Ensures readiness of arresting gear, barricade and visual landing aid systems. Supervises recovery of aircraft. Plans, schedules, supervises and records preventive maintenance and repairs of launch and recovery equipment. Maintains inventory and custody of ready service spare parts and accessories.

Related Codes: NOBC - 8608; DOD Group - 2G Operations Staff

8618 AIR OFFICER [AIR]

Directs and administers air department on board aircraft carriers. Supervises activities of aviation personnel concerned with plane launching and landing, line preparations, plane handling and shipboard repair and maintenance of embarked aircraft. Schedules work for ship's aviation shops, ensuring compliance with work orders submitted. Directs arming, fueling and line checks of aircraft in preparation for launching.

Related Codes: NOBC - 8620, 8625, 8654; DOD Group - 2G Operations Staff

8620 AIR OPERATIONS OFFICER, AFLOAT [AIR OPS AFLOAT]

Controls and schedules flight operations of ship's aircraft. Prepares flight operations plan, indicating daily flight and plane assignment. Delivers briefings to embarked pilots. Maintains radio communications with aircraft and provides directions on launching-landing operations. Tracks aircraft in Combat Information Center (CIC). Furnishes CIC with information regarding air operations. Evaluates operation with pilots and prepares operational reports.

Related Codes: NOBC - 8668, 8680, 8685; DOD Group - 2G Operations Staff

8621 STRIKE OPERATIONS OFFICER [STRK OPS]

Assists in the planning and execution of air strike operations. Makes prestrike target analysis. Prepares recommendations for the employment of nuclear and/or conventional strike weapons. Coordinates planning with respect to type and quantity of ordnance requirements for strike. Recommends type and number of participating aircraft for commander's consideration. Monitors communications concerned with strike. Assists commander in controlling launch. As

directed, assists command in tactical determinations during the development of strike operations. Supervises operation control center.

Related Codes: NOBC - 8972; DOD Group - 2G Operations Staff

8625 AIRCRAFT HANDLING OFFICER [A/C HANDLING]

Directs flight and hangar deck operations aboard carrier, including spotting, landing and launching aircraft and handling crashes and fires. Directs flight deck officer and hangar deck officer. Supervises elevator operations between flight and hangar decks. Directs spotting of aircraft for catapult launching and flyaway. Directs training of personnel in techniques of spotting, plane handling, recovering and jettisoning planes, rescue of pilots and combatting deck fires. Establishes safety practices.

Related Codes: NOBC - 8654, 8660; DOD Group - 2G Operations Staff

8638 AIRCRAFT FUELING OFFICER [A/C FUEL]

Supervises loading and unloading of aviation fuel and fueling and defueling of squadron aircraft. Arranges for adequate supply of aviation gasoline, submitting requisitions to ship or station supply department. Controls pumping operations when loading or unloading gasoline. Arranges for fueling and defueling of aircraft. Trains crewmen in particular duties and safety procedures. Supervises maintenance and repair of fueling equipment.

Related Codes: NOBC - 8660; DOD Group - 8B Supply

8644 RADAR AIR TRAFFIC CONTROL CENTER OFFICER [RATCC]

Supervises operation of Radar Air Traffic Control Center (RATCC). Controls movement of air traffic within designated area. Establishes operating procedures in accordance with military directives and civil regulations. Maintains liaison with Federal Aviation Agency, local base officials and other agencies concerned with air traffic control. Represents RATCC in accident investigations and regulation infractions. Directs flight checks to ensure highest degree of safety and efficiency.

Related Codes: NOBC - 8658; DOD Group - 2G Operations Staff

8647 AIR TRAFFIC CONTROL OFFICER [AIR TRAF CTL]

Manages air traffic control division at air facility not equipped with a radar air traffic control center. Controls movement of air traffic within designated area of control. Directs operations of control tower, ground controlled approach and air surveillance radar where installed. Supervises issuance of flight clearances. Coordinates with maintenance personnel to ensure proper operating condition of air traffic control equipment. Advises operations officer on air traffic control matters.

Related Codes: NOBC - 8644; DOD Group - 2G Operations Staff

8653 OFFICER IN CHARGE, AVIATION UNIT OR DETACHMENT [OIC AV U/DET]

Directs operations of aviation unit or aviation detachment of major activity. Ensures compliance with policies, directives, regulations and instructions received from parent activity or other authority. Supervises training requirements, reviewing proficiency of personnel assigned and instituting training to correct deficiencies. Operates unit aircraft on routine training and operational flights.

Related Codes: NOBC - 8618, 8620, 8668, 8670, 8672; DOD Group - 2E Ground and Naval Arms

8654 FLIGHT DECK OFFICER [FLGT DECK]

Assists aircraft handling officer in supervision of aircraft handling in flight deck operations. Plans plane spotting on flight deck. Trains and supervises plane handlers in spotting and moving planes. Trains and controls flight deck crash crews and fire crews during salvage, plane recovery, pilot rescue, plane jettisoning, or flight deck fires. Supervises maintenance of flight deck equipment.

Related Codes: NOBC - 8608, 8625, 8660; DOD Group - 2G Operations Staff

8656 AVIATION SAFETY OFFICER [AV SAFETY]

Represents commanding officer in conduct of aviation safety program. Maintains intercommand and interdepartmental liaison to implement flight safety, ground safety, and/or nuclear safety. Prepares contingency plans to ensure coordination of efforts by crash crews, medical department and security department in the event of an accident. Disseminates aviation safety literature. Ensures that communications equipment, navigational aids and other electronic aids meet designated requirements. Inspects and recommends safety improvements for flight and ground operations. Serves as member of aircraft accident board.

Related Codes: NOBC - 8995; DOD Group - 4J Safety

8658 CONTROLLED APPROACH OFFICER [CTL APPROACH]

Supervises operation of ground controlled approach or carrier controlled approach units electronically guiding landing aircraft. Ensures correct equipment operating site. Trains personnel in all operating positions. Directs aircraft on predetermined glide path to landing area by voice-radio communication. Ensures equipment operational readiness. Ensures meeting of requirements for flight testing of equipment. Provides instruction and check flights to ensure proficiency of controller personnel in all emergency procedures.

Related Codes: NOBC - 8644; DOD Group - 2G Operations Staff

8659 GUIDED MISSILE TEST OFFICER, AIR-LAUNCHED [GM TEST A-LNCH]

Supervises assembly, test and repair of air-launched guided missiles and components. Directs preparation of guided missiles for flight. Supervises operation and repair of guided missile test equipment. Supervises loading and depreserving of guided missiles and components. Stores and preserves components failing to meet tests. Submits routine casualty reports to cognizant systems commands and contractors. Maintains spare parts inventory within allowance. Keeps administrative records.

Related Codes: NOBC - 6275, 6280, 6281; DOD Group - 4F Missile Maintenance

8660 HANGAR DECK OFFICER [HANGAR DECK]

Assists aircraft handling officer in supervision of aircraft handling on hangar deck in readiness for movement to flight deck. Ascertains number and type of aircraft required for daily flight operations and plans work for plane handlers. Supervises spotting of scheduled aircraft at various elevators for transfer to flight deck. Ensures securing of planes upon completion of flight and supervises maintenance and upkeep of assigned hangar deck machinery and equipment.

Related Codes: NOBC - 8608, 8625, 8654; DOD Group - 2G Operations Staff

8662 LANDING SIGNAL OFFICER [LSO]

Directs and controls aircraft in carrier approach landings. Signals pilots in carrier approach and landings. Supervises and coordinates pilot carrier landing training. Advises commanding officers of pilot progress and proficiency. Maintains records of field carrier landings. Advises commanding officers of landing conditions. Instructs and qualifies landing signal officer trainees.

Related Codes: NOBC - 8658; DOD Group - 2G Operations Staff

8668 OPERATIONS OFFICER, AVIATION SHORE ACTIVITY [OPS AV SHRACT]

Directs operations department at naval air station, comprising navigation, air traffic control, engineering, launch, photographic and meteorologic activities. Establishes and implements department policies and procedures; directs crash, salvage and rescue operations. Renders meteorological services to station and fleet activities. Provides continual air traffic control, ensuring operation of ground-controlled-approach equipment during adverse weather conditions.

Related Codes: NOBC - 8620, 8680; DOD Group - 2G Operations Staff

8670 SQUADRON COMMANDING OFFICER [SQN CO]

Commands aircraft squadron in carrying out assigned mission. Prepares squadron policies and directives, complying with regulations and instructions from higher commands. Organizes divisions, including aircraft maintenance, aviation ordnance, flight operations, material and training, administrative and supply. Conducts squadron training. Reviews flight proficiency. Ensures operational readiness of aircraft. Investigates delays by maintenance personnel. Operates squadron aircraft.

Related Codes: NOBC - 8672, 8680, 8685; DOD Group - 2A Fixed-Wing Fighter and Bomber Pilots

8672 SQUADRON EXECUTIVE OFFICER [SQN XO]

Assists commanding officer in carrying out and administering squadron policies and directives. Prepares squadron bills and orders. Interviews and assigns enlisted personnel. Consults department heads and division officers when planning squadron activities. Establishes daily routine. Directs such administrative activities as maintaining personnel records, reviewing all correspondence, enforcing system for advancement in rating and preparing required reports. Operates squadron-type aircraft.

Related Codes: NOBC - 8620, 8680; DOD Group - 2A Fixed-Wing Fighter and Bomber Pilots

8673 SQUADRON SPECIAL MISSIONS OFFICER [SQN SPEC MSNS]

Assists commanding officer in developing plans and policies related to employment of special mission aircraft. Supervises maintenance, operations, tactics, flight/ground training and data analysis associated with unique sensor system. Conducts test with new sensor prototypes. Prepares and disseminates reports concerning system's status, utilization, improvement and data collection/analysis. Maintains liaison with operational commanders, systems commands, intelligence activities and civilian contractors.

Related Codes: NOBC - 8585, 9038, 9046; DOD Group - 2G Operations Staff

8675 SQUADRON DEPARTMENT HEAD [SQN DEPT HD]

Assists Commanding Officer by exercising leadership of respective squadron department in execution of squadron mission. Types of Squadron Departments include but are not limited to: Operations, Maintenance, Administrative, Safety, Training, and other functional areas deemed departmental equivalents by the Commanding Officer.

Related Codes: NOBC - 2615, 3290, 8190, 8680; DOD Group 2E Ground and Naval Arms

8680 SQUADRON OPERATIONS OFFICER [SQN OPS]

Controls and directs squadron flight operations. Prepares daily flight schedules. PART D

ADDITIONAL QUALIFICATION DESIGNATION (AQD) CODES

1. General

a. Additional Qualification Designation (AQD) codes enhance officer and billet designator codes by identifying more specifically the qualifications of officers and the qualifications required by a billet or awarded to the incumbent of a billet.

b. The AQD structure:

(1) identifies additional qualifications, skills and knowledge required to perform the duties and/or functions of a billet beyond those implicit in the billet designator, grade, NOBC, or subspecialty;

(2) where specifically noted, identifies billets that provide unique qualifications for the billet incumbent; and

(3) facilitates retrieval of management information required to support more precise officer personnel planning.

c. The AQD codes consist of three characters, either alpha-numeric or all-numeric. The first character of an alpha-numeric code identifies a broad occupational area closely related to the designator. The second character specifies the qualifications appropriate to that occupational area with the third character further defining the specific qualifications. The all-numeric AQD codes are a listing of specific qualifications applicable to certain officer designators.

2. Application

a. Officer AQD. When entered in an officer's record, the AQD code identifies the attainment of skills and knowledge, as recognized by competent authority, in addition to those identified by the officer designator, grade, NOBC or subspecialty.

b. Billet AQD. When applied to a billet on a manpower authorization, the AQD code generally identifies a requirement for skills and knowledge needed to perform the duties and/or functions of a billet additional to those identified by the billet designator, grade, NOBC or subspecialty. The AQD generally indicates a requirement for an officer who has attained special qualifications through training and/or experience. However, where specifically indicated, the AQD identifies a unique qualification awarded to the incumbent through service in the coded billet.

3. Assignment

a. Officer AQD. Cognizant Bureau of Naval Personnel assignment officers, in coordination with placement officers, are responsible for ensuring AQD codes are assigned to officers so the officers' records are reflective of all qualifications and skills achieved. In some cases, the codes are awarded only when approved by administrative board action. In specific cases, where the billet AQD represents a qualification attained by virtue of service in that billet, the AQD will be automatically awarded to the incumbent upon his/her detachment from the billet.

b. Billet AQD. Cognizant sponsors in liaison with activities are responsible for identifying billets to be coded with selected AQDs.

4. AQD Primary Consultants and Consultants are listed opposite the respective AQD codes in the following sections. The functions, tasks and responsibilities of the primary consultants and consultants are contained in OPNAVINST 1000.16 series.

5. Justification for Establishment and Retention of AQDs. For establishment and retention within the AQD structure, an AQD code should meet the following criteria:

a. it must identify qualifications, skills and knowledge required to perform the duties and/or functions of a billet that cannot be identified by the billet designator, grade, NOBC or subspecialty; and/or

b. it must identify qualifications, skills and knowledge attained by officers in addition to those identified by the officer designator, grade, NOBC or subspecialty.

c. It does not duplicate an existing code.

d. It has practical application in planning, personnel control, career management, training, experience, or manpower information functions.

e. It should be appropriate for identification of additional qualifications required by the functions of the billet, peacetime and mobilization, and/or additional qualifications of officers, both active and inactive.

f. It identifies a minimum of 15 billets and/or officers.

6. Recommendations for Establishing, Deleting, or Revising AQDs

a. Commands recommending the establishment, deletion, or revision of AQDs should consider the AQD criteria listed in paragraph 5. Additionally, all recommendations should include the appropriate information as follows:

(1) Recommendations to establish AQDs must include:

(a) Recommended code number, second and third character titles, and primary consultant and consultants for each code.

(b) Description of officer and/or billet criteria indicating whether the officer must be coded with that AQD or will be awarded the code upon completion of tour in that billet. The description should also include special notes as appropriate.

(c) List of designators that can hold the AQD code along with minimum and maximum paygrades applicable to officers and billets.

(d) Funding implications.

(e) Number and location of billets by activity type that will be identified by the proposed AQD.

(f) Information on how the qualifications are presently identified.

(g) Justification: a statement as to why existing billet descriptors (i.e., NOBC, grade, or subspecialty) are insufficient without the proposed AQD; other historical or amplifying information, if any.

(h) Point of contact (include telephone (commercial and DSN) number, telefax number, and e-mail address).

(2) Recommendations to delete AQDs must include the reason(s) for deletion (e.g., qualifications duplicated by existing designator, sufficiently identified by means other than AQD, or insufficient requirements reflected on manpower authorizations) and any other information necessary for prudent consideration at each level of review.

(3) A proposal to revise an AQD must include justification for the proposed revision and the proposed rewording or recoding of the current AQD.

b. Submit all recommendations according to the procedures outlined in the introduction of this volume.

ACQUISITION
First Character: A

AQD codes having the first character "A" are used to identify acquisition related billets and personnel required to be identified and managed by the Defense Acquisition Workforce Improvement Act of 1990 (DAWIA).

- The second character identifies the position category (career field).
- The third character "N" (non-critical) is assigned to billets up through paygrades 0-5; "C" (critical) is assigned to positions required to be filled by an 0-5 or senior grade officer; "D" requires ASN(RD&A)(DACM) approval; and "1, 2, or 3" are assigned to personnel fully qualified and certified for their position category and training level.

Acquisition Professional Community (APC) AQDs are assigned as a result of screening by the APC Selection Board.

Primary Consultant for AQD assignment is N1, and consultants are respective Officer Community Managers in N2.
